Aislesaver® Mobile Shelving

APC signature range Aislesaver® keeps your collections organised and secure. Our mobile shelving systems are designed to maximise space and offer a range of accessories to fit the needs of your collection, staff and facility.

APC range of mobile shelving include Manual systems (Aislesaver® Ezi-Slide AT), Mechanically Assisted systems (Aislesaver® Ezi-Drive AT & ST), Powered systems (TouchDrive®) and Wire shelving system (TopTrack®)

Bruynzeel Electronic drive system "Dynamic II"

This top of the line electronic system is full of innovation. Advanced safety systems, quick access to any aisle, intuitive user interface and accompanying app.

The Dynamic II drive system is equipped with an ergonomic handle for ease of use. It can also be operated with the colour touch panel which additionally provides you information on aisle numbers, system movement and safety messages.

No matter how many bases your system has, you can control all of them at once. Just move the handle of the base that you want to move and Dynamic II does the rest.

Optimal accessibility with maximum storage capacity.

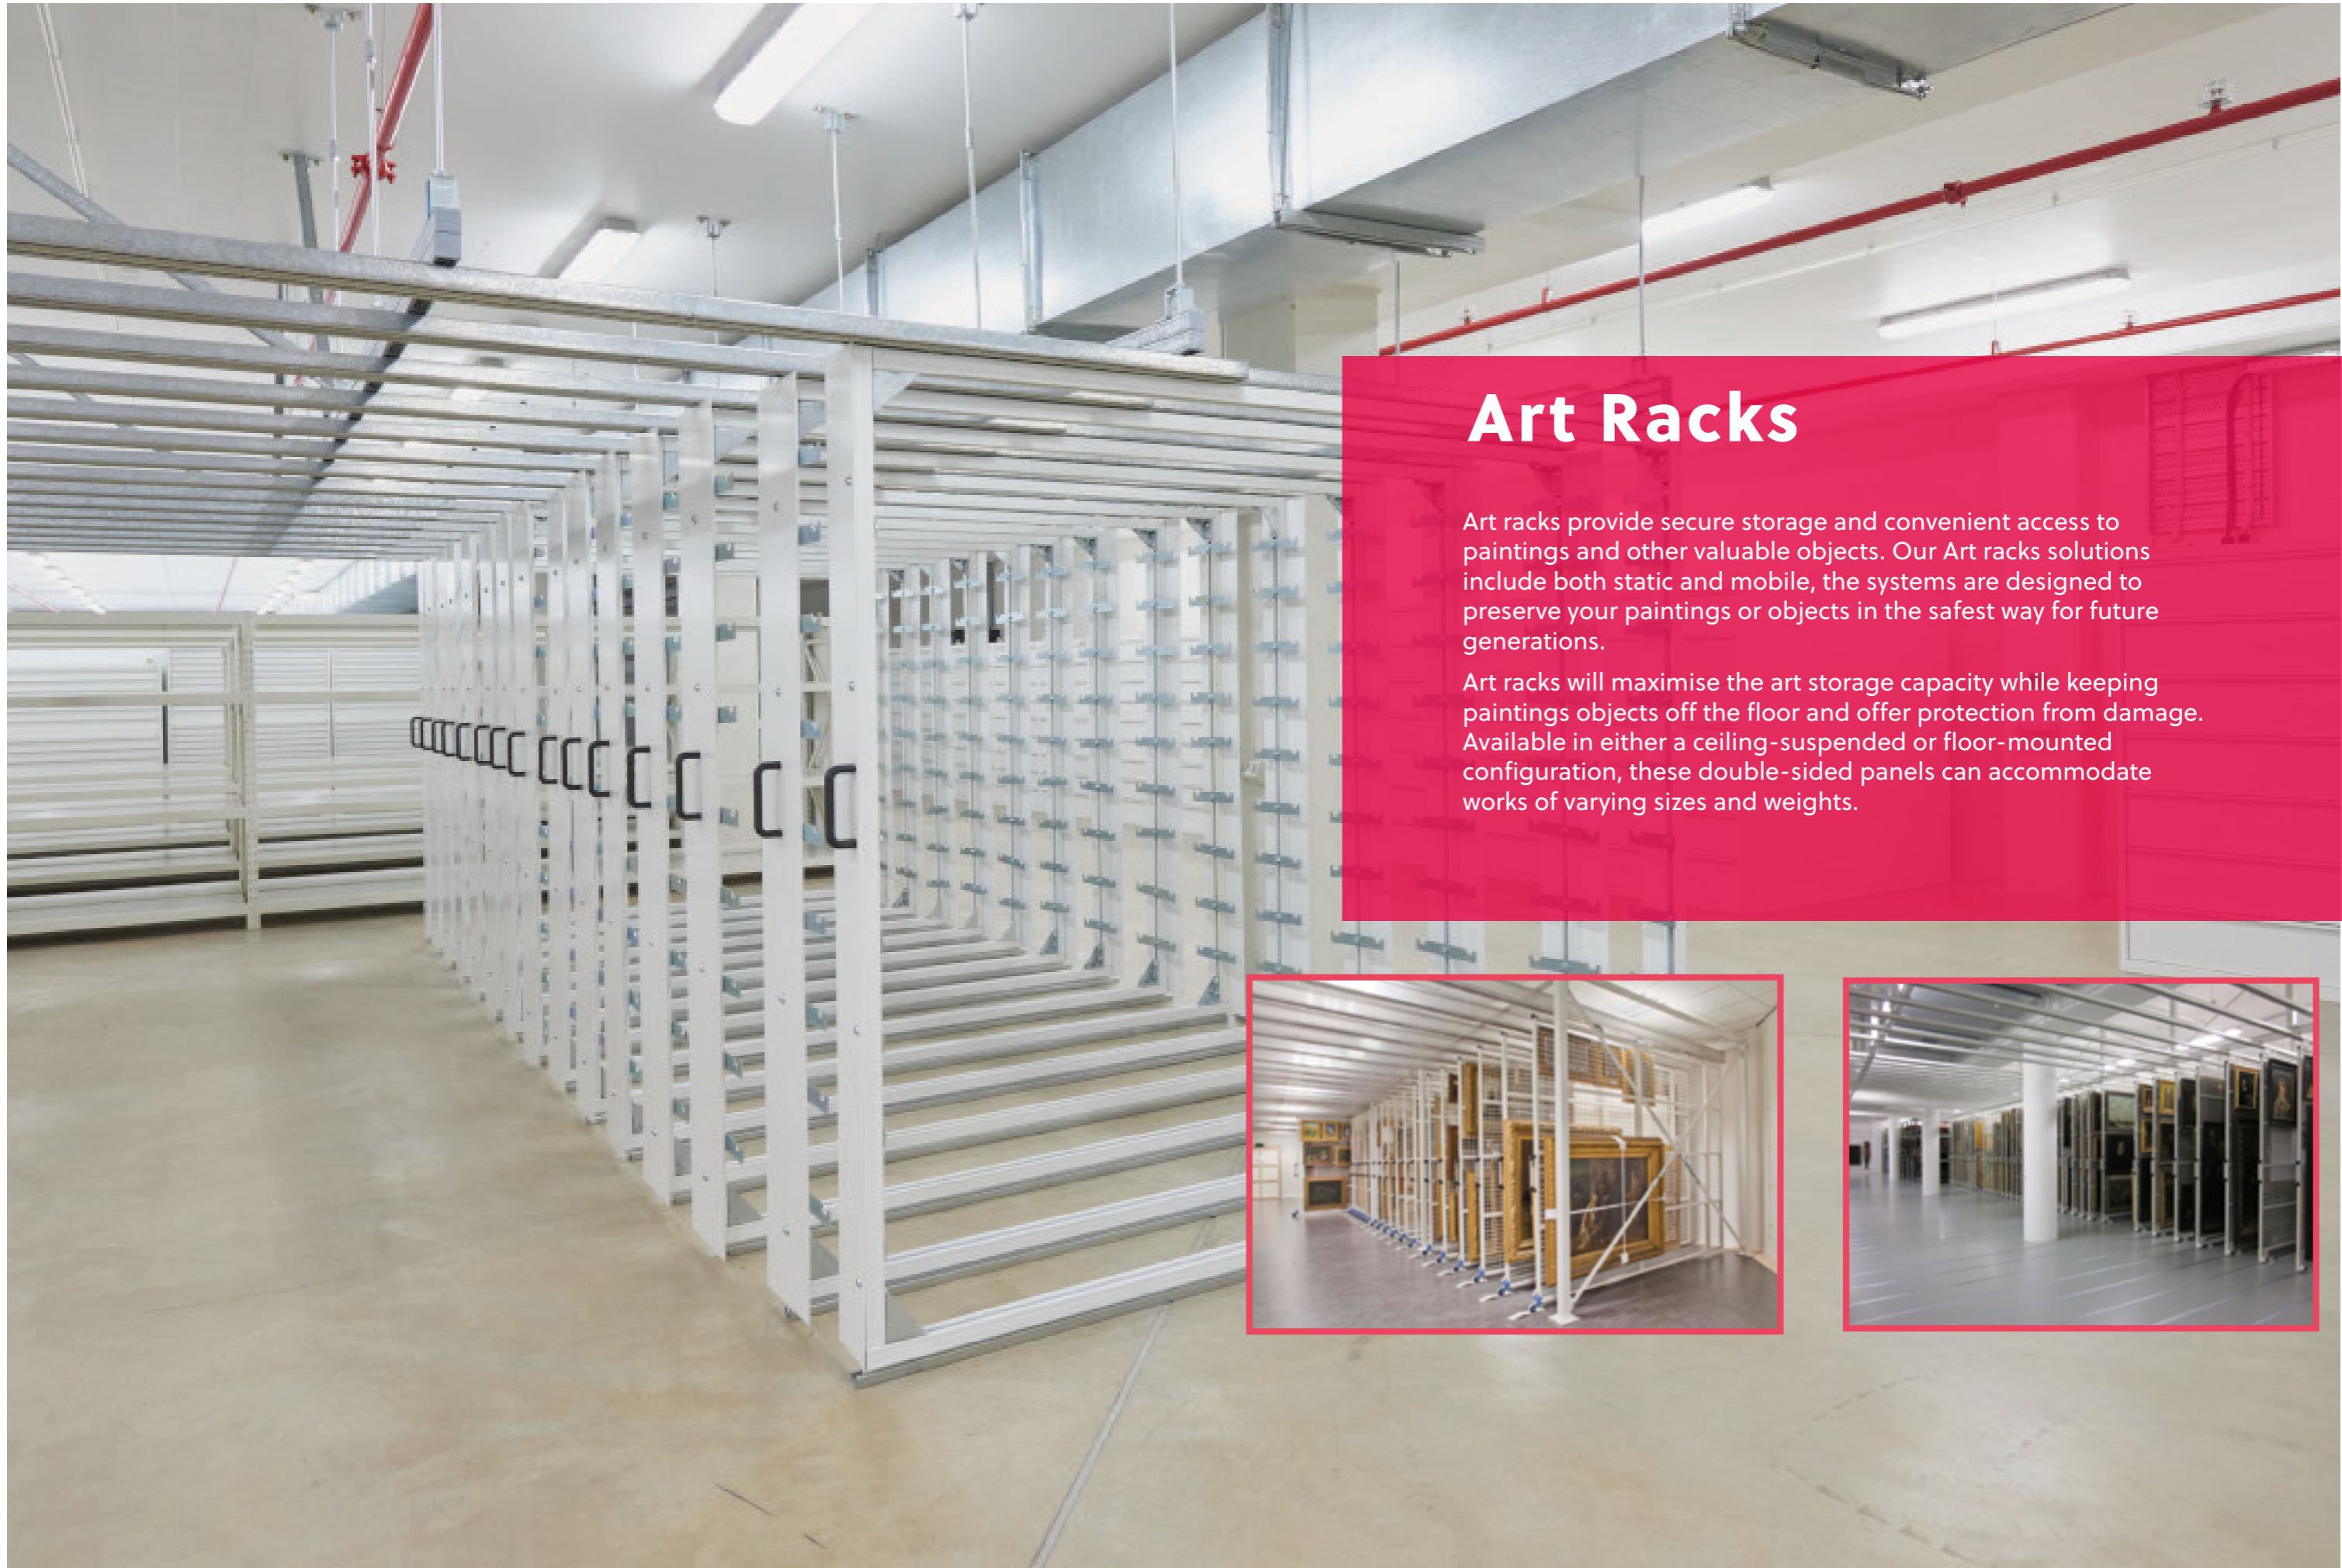

With settings, safety messages and updates easily available via the Dynamic II app (iOS and Android), this system is the future of high density storage.

Authorized Partner

APC are proud to partner with Bruynzeel Storage Systems covering Australia & New Zealand

Bruynzeel Storage Systems are market leaders in Europe for innovative and space creating solutions with a vision to create solutions that contribute to a sustainable planet. Bruynzeel provide storage systems for museums and libraries and are pioneering innovative solutions for vertical farming. APC's capabilities to deliver customised storage solutions across multiple industries (e.g. Education and Government) are a natural fit with Bruynzeel.

Art Racks

Art racks provide secure storage and convenient access to paintings and other valuable objects. Our Art racks solutions include both static and mobile, the systems are designed to preserve your paintings or objects in the safest way for future generations.

Art racks will maximise the art storage capacity while keeping paintings objects off the floor and offer protection from damage. Available in either a ceiling-suspended or floor-mounted configuration, these double-sided panels can accommodate works of varying sizes and weights.

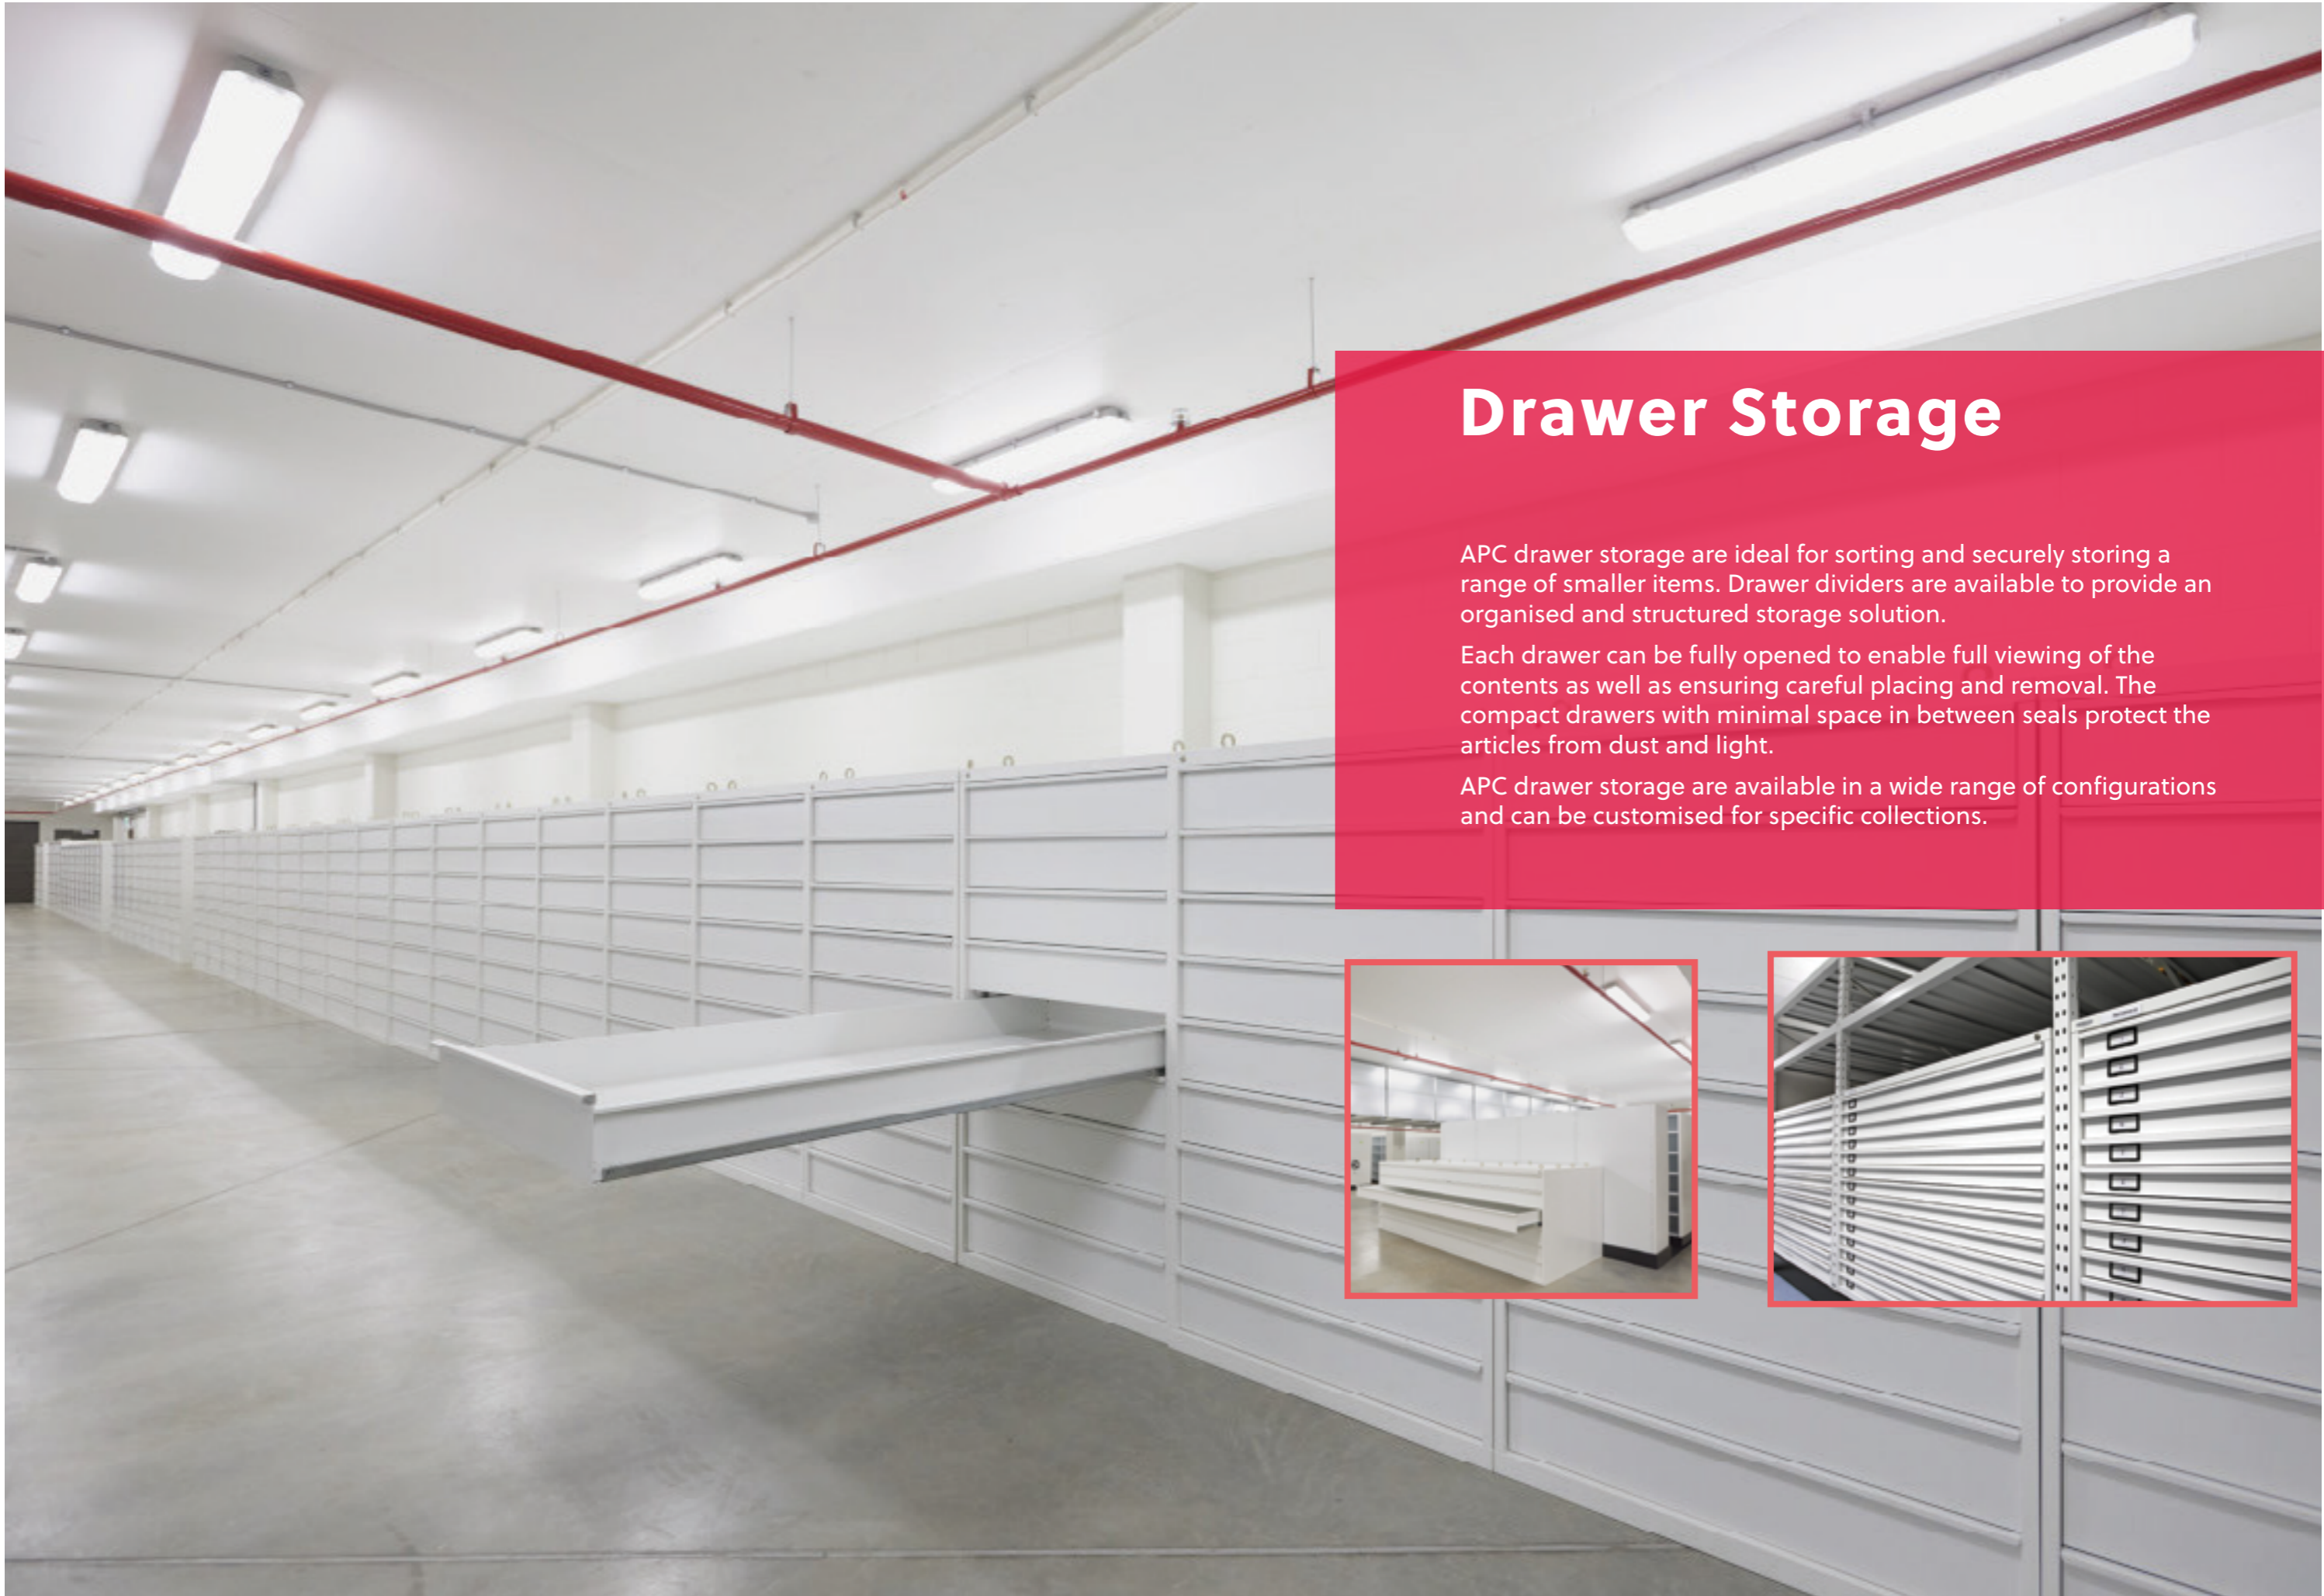

Plan Cabinets

Plan cabinets are the perfect way to carefully store and protect large, low profile items, such as maps, flags and artifacts.

Each drawer can be fully opened to enable full viewing of the contents as well as ensuring careful placing and removal. The compact drawers with minimal space in between the seals protect the articles from dust and light.

APC plan cabinets are available in a wide range of configurations and can be customised for specific collections.

Drawer Storage

APC drawer storage are ideal for sorting and securely storing a range of smaller items. Drawer dividers are available to provide an organised and structured storage solution.

Each drawer can be fully opened to enable full viewing of the contents as well as ensuring careful placing and removal. The compact drawers with minimal space in between seals protect the articles from dust and light.

APC drawer storage are available in a wide range of configurations and can be customised for specific collections.

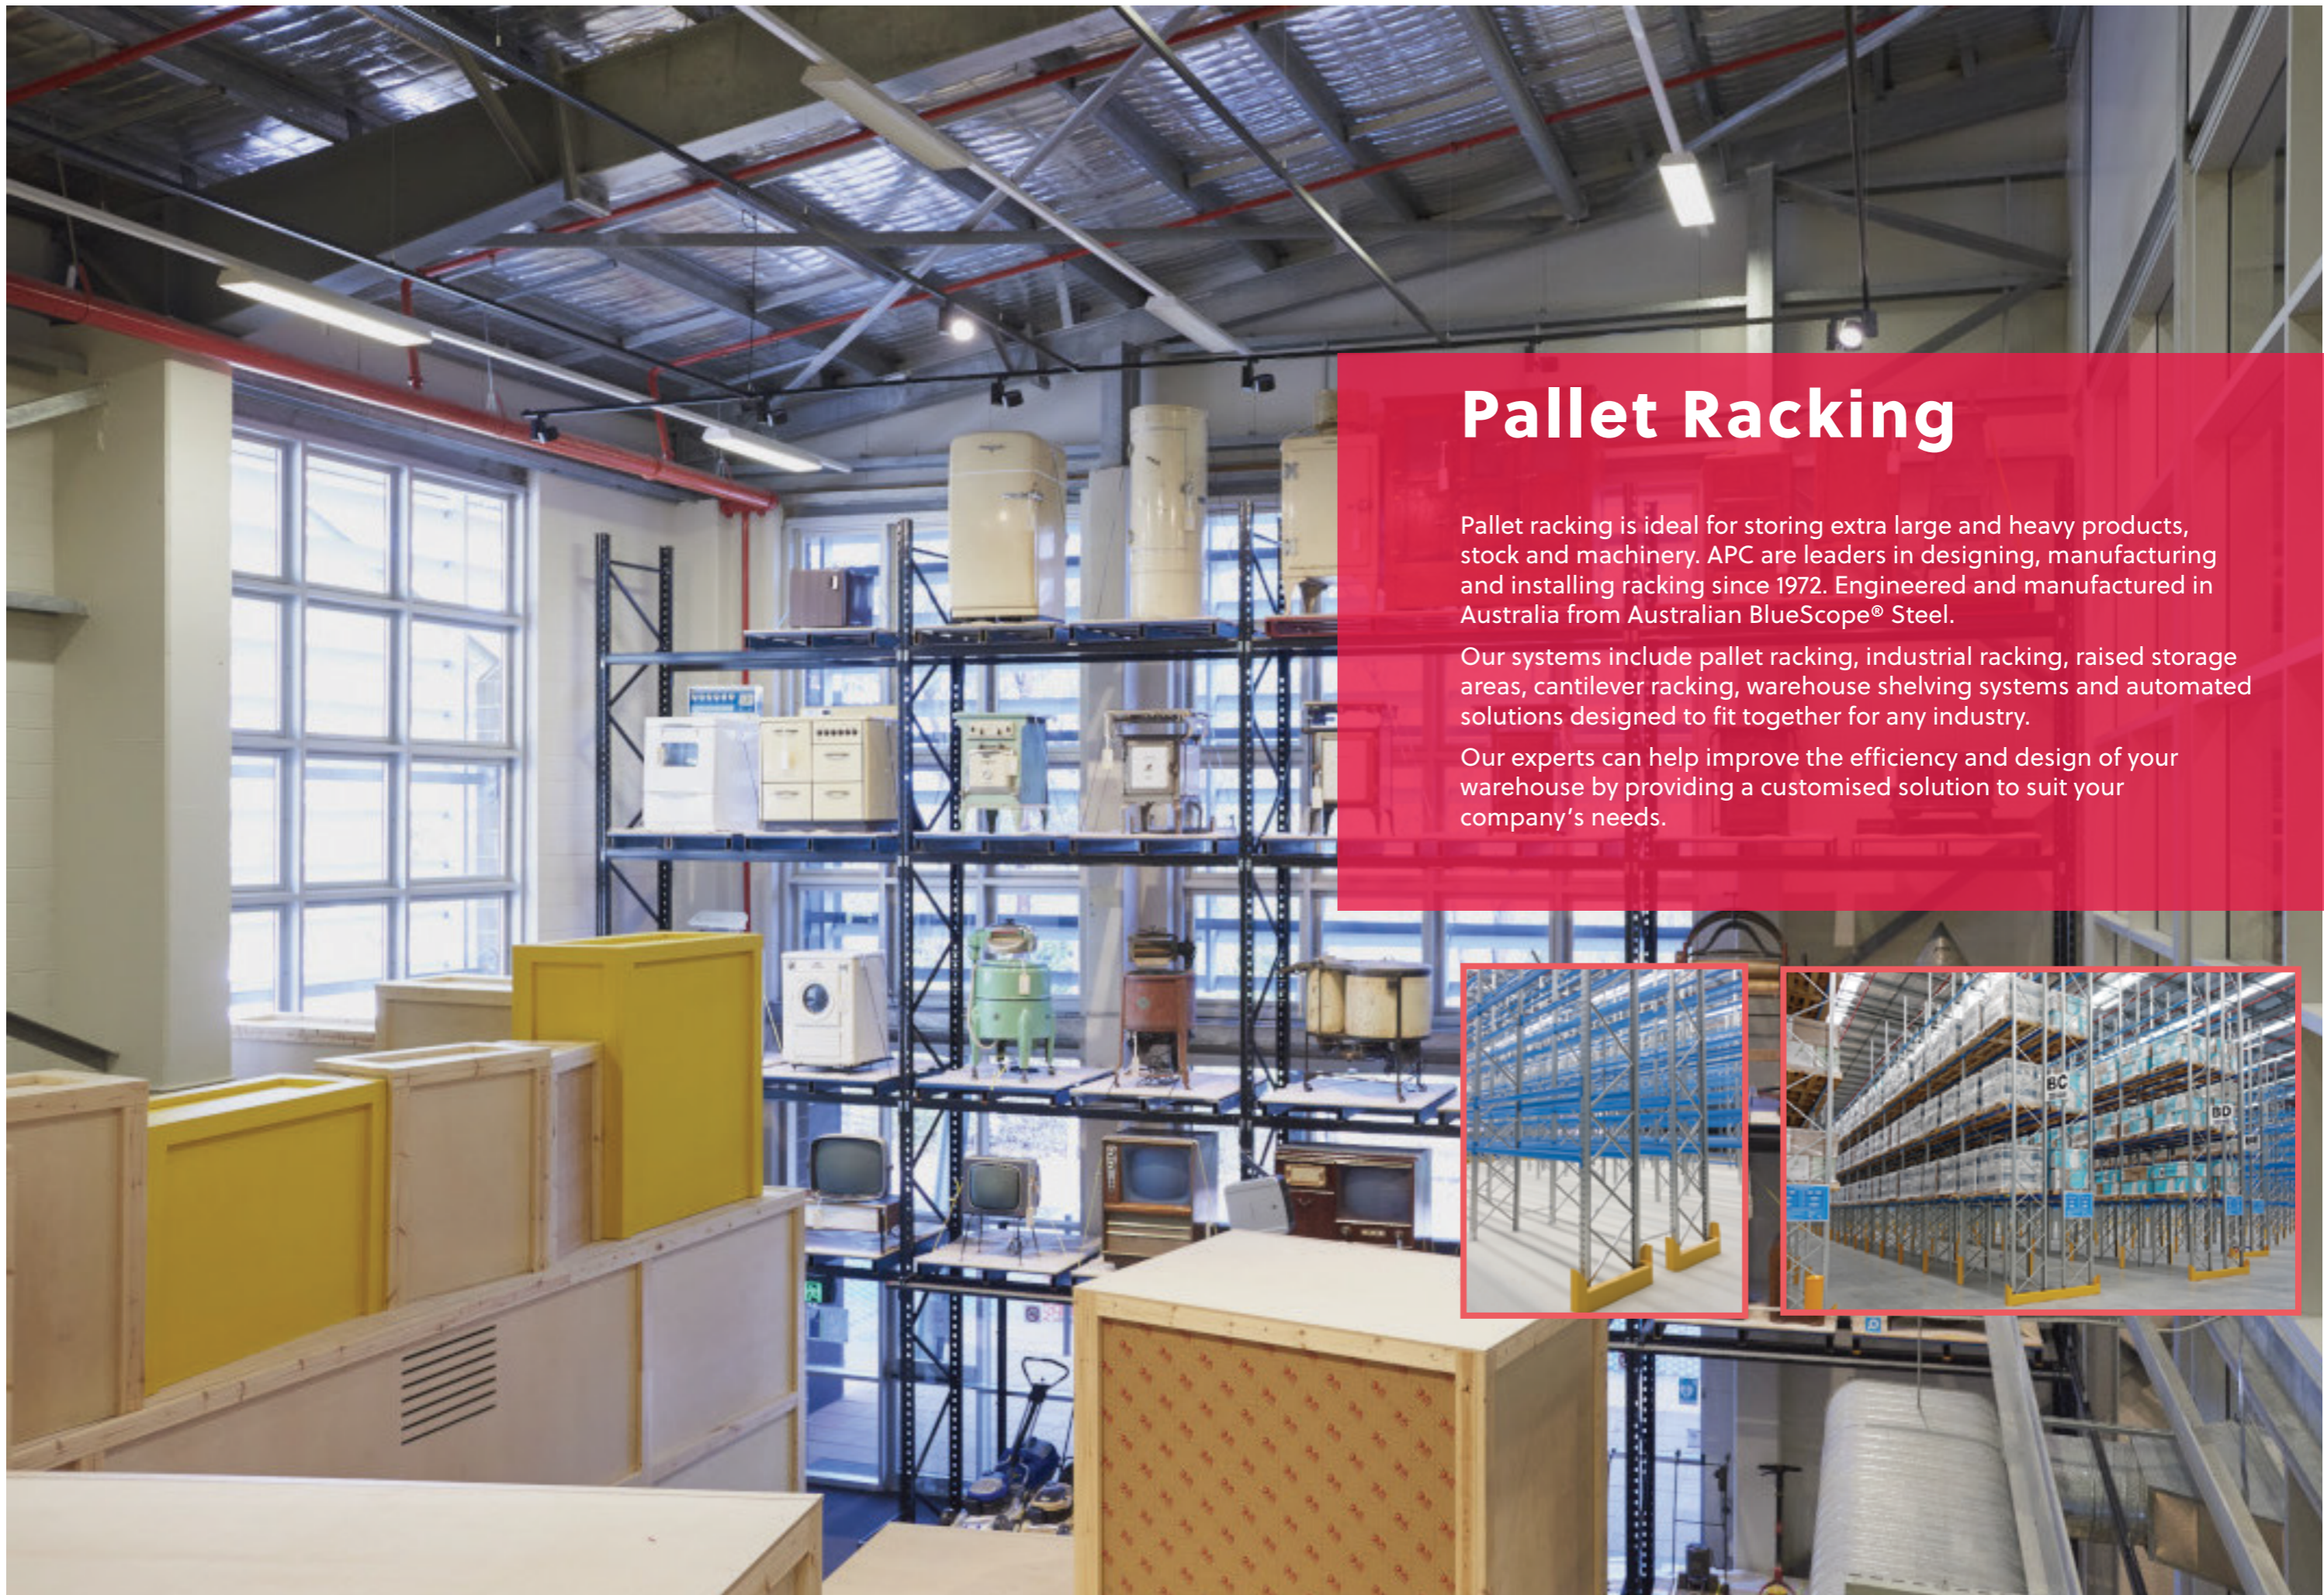

Longspan Shelving

Longspan shelving is a heavy-duty shelving option which can be used to store and display medium to large objects such as furniture, rugs, archive boxes and long or irregular shaped items. Capable of storing up to 400Kg per shelf, longspan is a safe and robust solution.

Longspan can be integrated with APC Aislesaver® for a heavy-duty mobile shelving option.

Pallet Racking

Pallet racking is ideal for storing extra large and heavy products, stock and machinery. APC are leaders in designing, manufacturing and installing racking since 1972. Engineered and manufactured in Australia from Australian BlueScope® Steel.

Our systems include pallet racking, industrial racking, raised storage areas, cantilever racking, warehouse shelving systems and automated solutions designed to fit together for any industry.

Our experts can help improve the efficiency and design of your warehouse by providing a customised solution to suit your company's needs.
