# Pharmacy Shelving

APC's Pharmacy Shelving is a pull-out drawer system with a transparent front for the visibility of stock and has flexible dividers to manage product lines. Each shelf can be mounted at any height and can be removed and adjusted at any time. There is also the option to have flat or tilted shelves to manage stock flows. The system can be used to store boxed, bottled and other medication types.

## Top-Track®

APC's Top-Track® Mobile Storage System optimises space and provides access to a large range of sterile and non-sterile medical supplies. The wire shelving provides excellent visibility ensuring staff can locate items quickly. Because the Top-Track® utilises an overhead track, the system provides unimpeded access to aisles and eliminates the possibility of debris gathering in a floor track. The wire shelving is ideal in environments where contamination is concerned and can be disinfected.

## Modular Storage Unit

This Modular Storage Unit combines wire shelving with modular basket storage. The system allows you to optimise your supply chain within your facility by providing a high density and customisable storage solution. The modular design of the system allows for easy integration with unlimited options to suit your needs.

The modular baskets are flat packed, so they can be disassembled, cleaned and stored. The trays are easily transported and the fine mesh base ensures even the smallest of items can be stored.

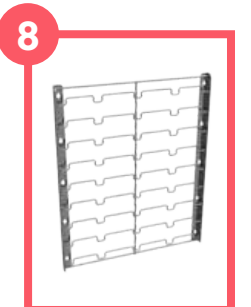

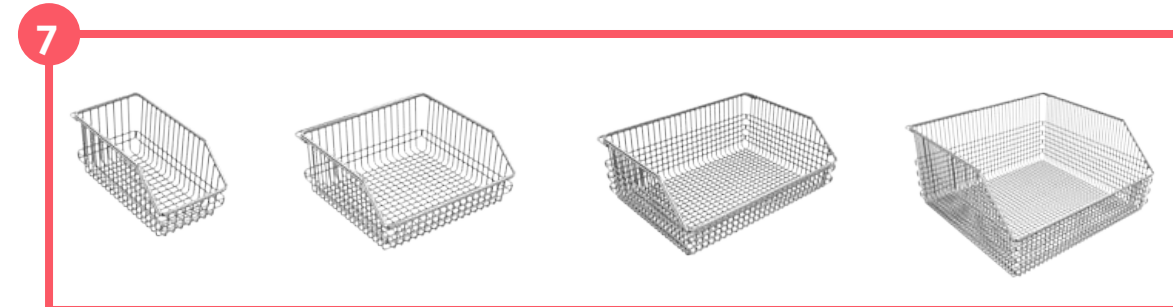

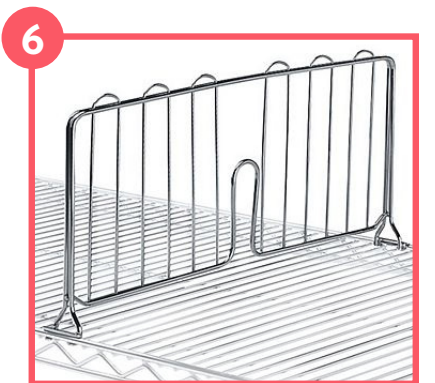

## Wire Shelving

Wire Shelving is a popular choice for the healthcare industry due to its anti-bacterial nature. Wire Shelving offers high visibility for quick access to medical products. Wire Shelving can be used throughout any healthcare environment and is suitable for wet storage and high contamination areas.

Our durable static and mobile wire units are available with adjustable shelf heights to suit the size of the items to be stored.

## Accessories WIRE SHELVING

APC's Wire Shelving units are complimented with a large range of accessories allowing you to make the most out of them.

- 1 - Additional Shelves
- 2 - Label Holders
- 3 - Castors
- 4 - Handle

- 5 - Ledges
- 6 - Shelf Divider
- 7 - Wire Baskets
- 8 - Wire Wall Panel

## Wire Baskets

APC's wire baskets offer an alternative to plastic trays. Our chrome and stainless-steel wire baskets are ideal for storing bandages, catheters, cannula's and instruments. Wire baskets are designed using fine mesh, so even small items can be stored. Baskets range in size; from small to extra-large.

Stackers can be included to store baskets on top of each other. Wire baskets are perfect for use with our wire shelving systems and wall mount applications. The design of the wire wall panels allows each unit to sit flush against each other, so you can connect as many panels as you like.

## Aislesaver®

Effective record keeping benefits all medical practices by helping to record and maintain patient information. APC's mobile shelving is ideal for this purpose, offering high density, centralised storage and easy access to files by simply moving the shelves. The system slides back and forth giving you direct access to every bay. The system only requires one aisle space over the entire unit which is a major advantage when space is limited.

Our Aislesavers are available in three configurations: manual (Ezi-Slide), mechanically assisted (Ezi-Drive), and powered (TouchDrive). The shelves are easy to adjust and bays are available in a variety of heights and widths.

# Shelving

APC has a versatile and adjustable shelving range ideal for storing an assortment of supplies across the healthcare industry. Our range consists of Uni-Shelf (Steel Shelving) and Uni-Span Shelving (Longspan Shelving).

Uni-Shelving is a versatile steel shelving system that can be easily added to or reconfigured. Accessories include pull-out reference shelves and drawers, wire file racks and shelf dividers.

If you require a shelving system made for the storage of heavy or long products, our Uni-Span Shelving can carry up to 500kg UDL per shelf. With the option of using stainless steel or wire mesh shelf levels, this option can be easily disinfected and remains usable in environments concerned with contamination.

## Clinical Trolleys

APC's multi-purpose trolleys have unlimited applications. They provide many benefits such as portable storage and surface space. Our range includes dressing trolleys, one and two draw trolleys, two and three-tier trolleys, Instrument trolleys, flatbed trolleys and sliding basket trolleys.

Our clinical trolleys feature fully welded caps to ensure a smooth finish with no gaps to reduce the entrapment of bacteria, folded edges for safety, draw runners and castor wheels with brakes. They are stainless steel making them ideal for sterile hospital settings including wet areas.

## Medical Record Trolleys

APC's medical record trolleys provide separate compartments for all folders and files, are lockable and come in two convenient sized units depending on your storage requirements. They are convenient for safely transporting files and patient information

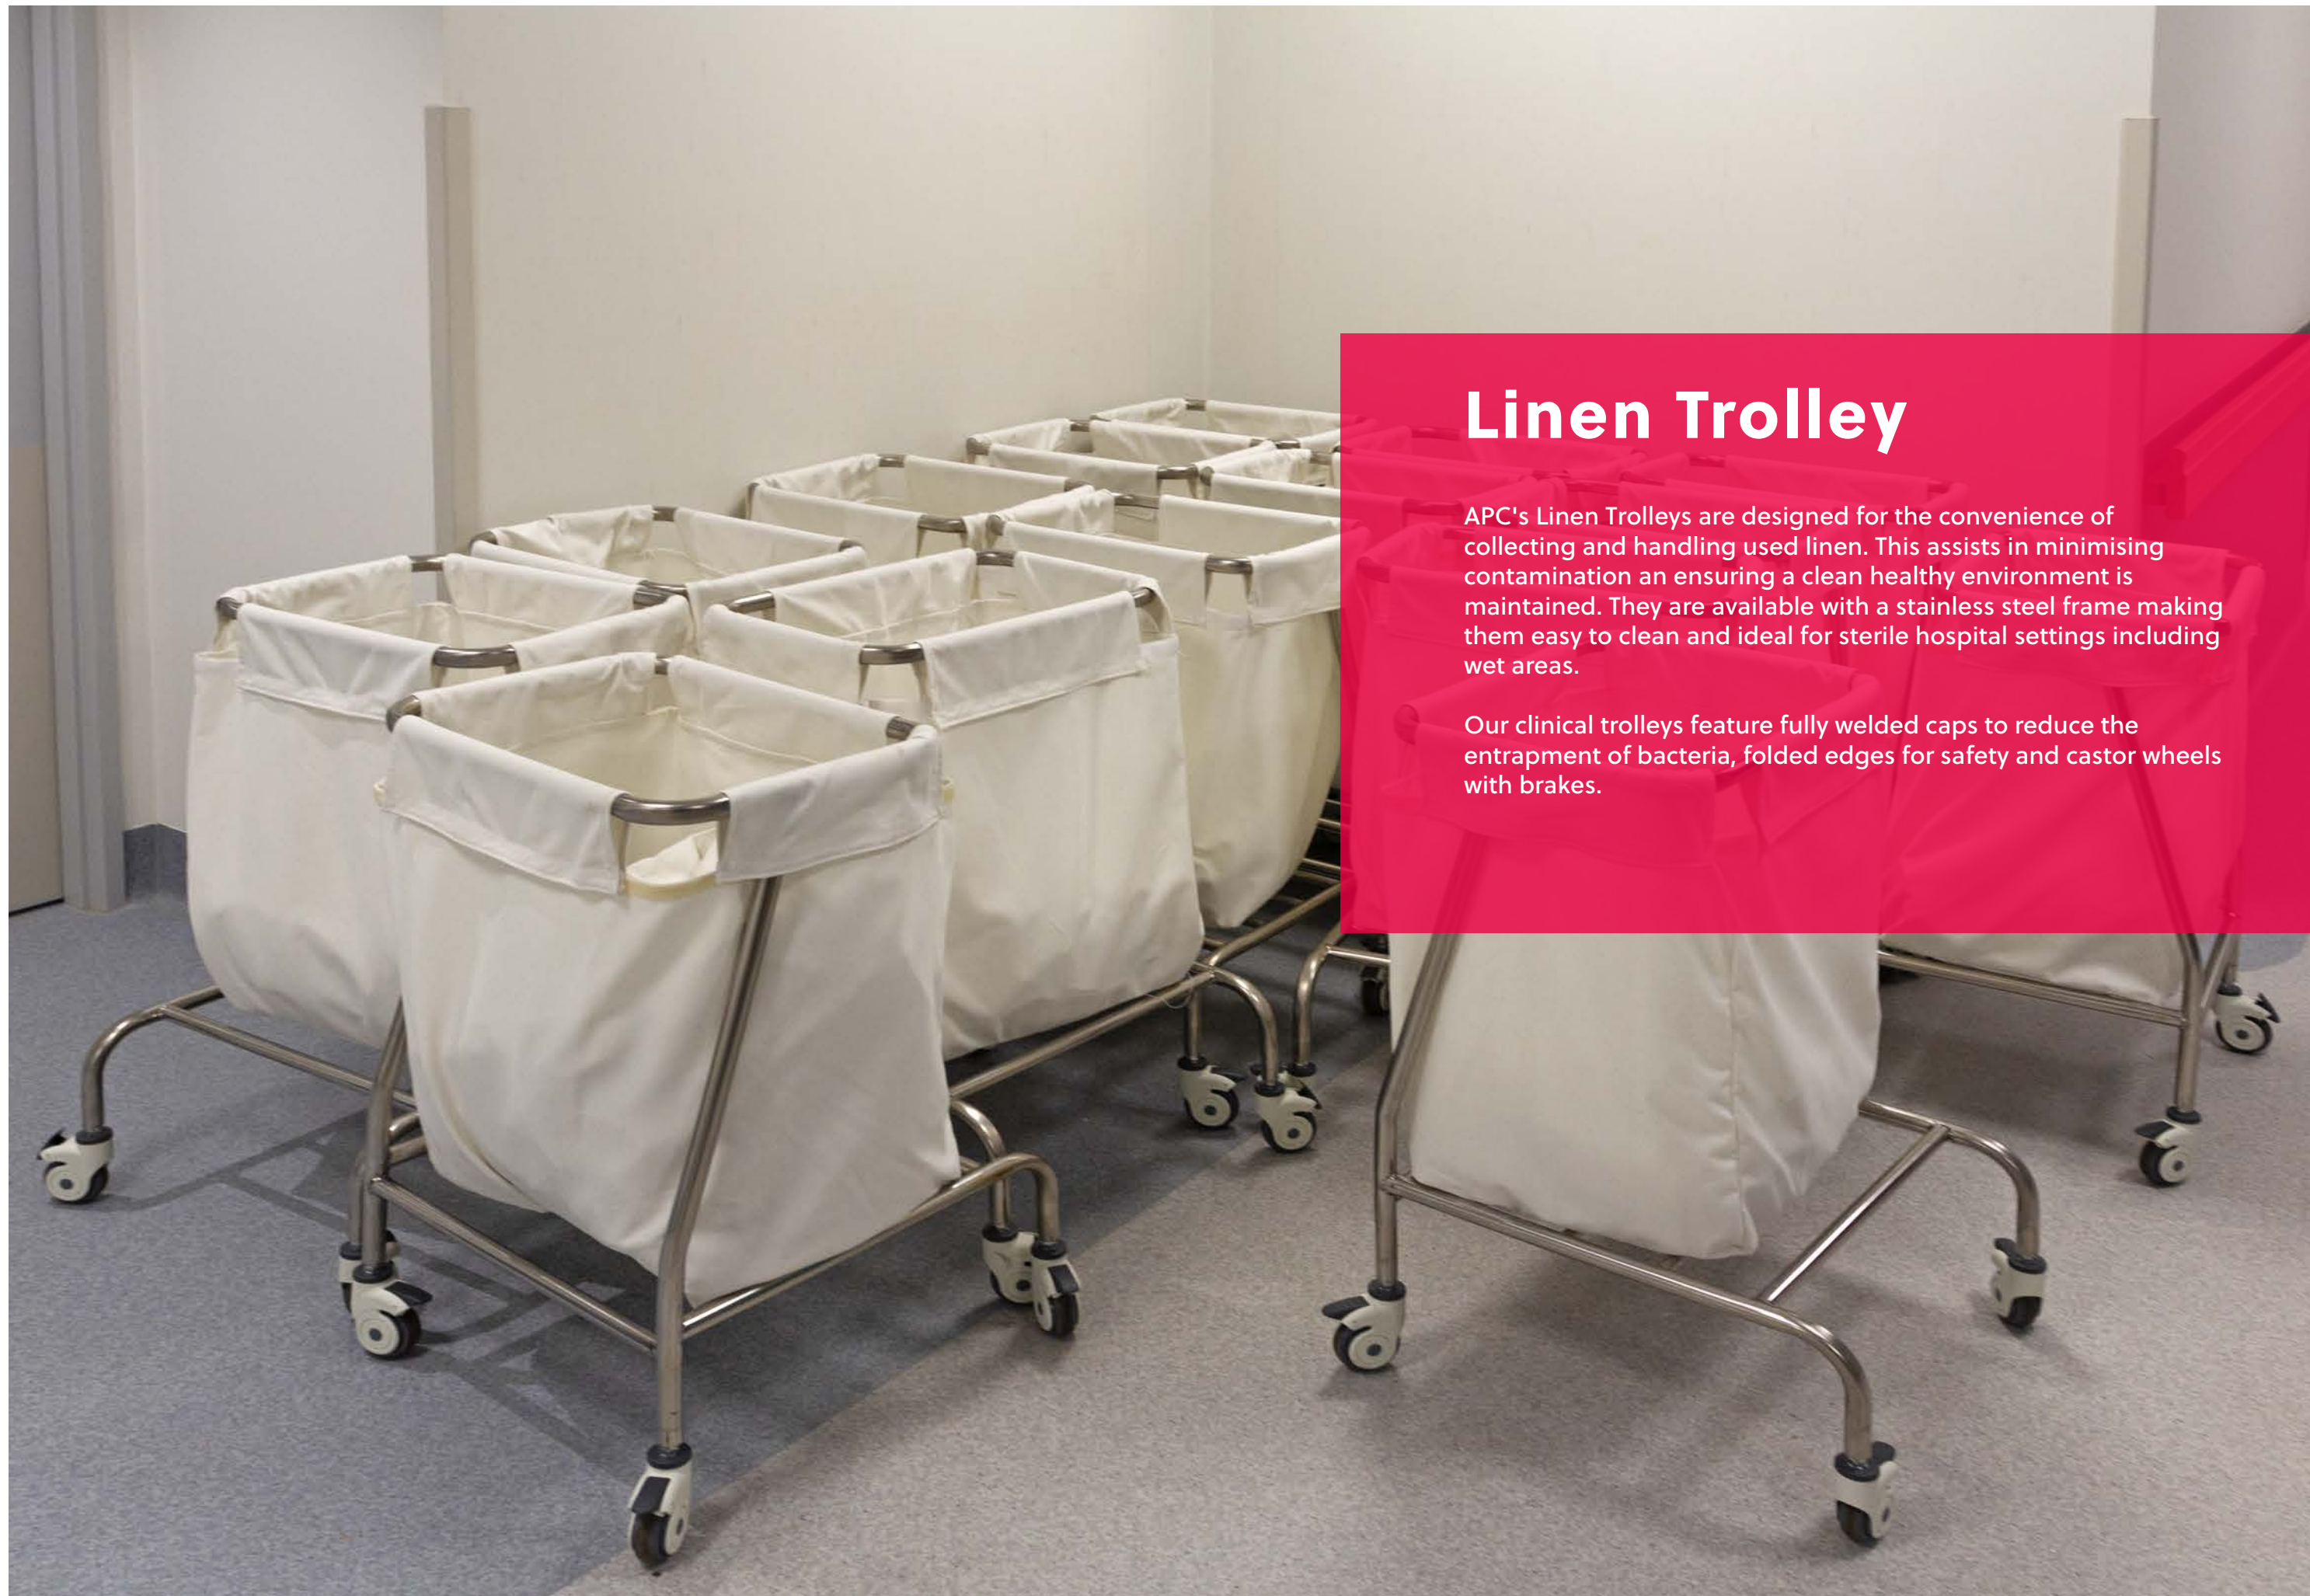

They feature castors with brakes and a push handle, so they can be easily maneuvered.

## Gas Trolleys

APC's gas trolleys make handling cylinders safe and easy. We have a trolley to fit C sized cylinders and a trolley to hold either C or D sized cylinders. Trolleys are robust and stable featuring securing straps for safety. The medical C-D cylinder trolley handle can be adjusted, making it easy to store.

## Linen Trolley

APC's Linen Trolleys are designed for the convenience of collecting and handling used linen. This assists in minimising contamination and ensuring a clean healthy environment is maintained. They are available with a stainless steel frame making them easy to clean and ideal for sterile hospital settings including wet areas.

Our clinical trolleys feature fully welded caps to reduce the entrapment of bacteria, folded edges for safety and castor wheels with brakes.

## Lockers

APC's locker range offers a compact and secure personal storage solution. Our range includes steel, ABS and heavy-duty plastic, and timber laminate lockers. APC's locker range can be ordered as a stand-alone unit or can be banked together as a bay of units, making lockers perfect for confined/restricted spaces.

We provide an assortment of locking mechanisms to ensure your lockers are not only secure but to suit the desired functionality. Our lockers also provide a large range of customisation and configuration possibilities with multiple sizes, tiers, finishes and perforations available per unit.

A long row of white tambour cabinets in a hallway. The cabinets have retractable doors and are arranged in a long line, creating a perspective view down the hallway. The floor is covered with a patterned carpet, and the ceiling has recessed lighting.

## Tambour Cabinets

Tambour cabinets use retractable doors making them ideal for confined spaces and narrow corridors. Our tambour cabinets come with adjustable interior levelling feet and are fitted with a barrel exchange locking system which comes with anti-bacterial keys. Shelving is adjustable and can withstand up to 40kg UDL per shelf. The unit can also be supplied with a range of accessories such as shelf dividers and wire file rack.

APC's large range of customisable storage cabinets also includes plan cabinets, swing door, sliding door and glass door cabinets, personal wardrobes, multimedia cabinets, filing cabinets and mobile pedestals.
