Pharmacy Shelving

APC's Pharmacy Shelving is the stocking device for drugs. It works as a pullout shelf, includes flexible and space saving dividers and a transparent front. The use of our shelving in the dispensary area of pharmacies and within the medicine stocks in hospitals delivers sensational space savings with the consequent free space left either for more stock or is used for other purposes.

The shelving system works on the modular metal structures so each drawer can be mounted at any height and can be removed and adjusted at any time by the pharmacist. It is made from high quality metal to ensure the longest duration.

Top-Track®

APC's Top-Track Mobile Storage System has been designed to combine high-density storage with durable stainless steel wire mesh shelving, making it ideal for hospitals.

We have taken our compacting mobile storage system (Aislesaver) and wire shelving and combined them. Unlike our Aislesaver, our Top-Track Mobile Storage System features a raised track (on top of the system), to allow for easy cleaning around and under the unit. The wire mesh design allows dust to fall through and not collect. The Top-Track System is commonly used in the medical industry to store a mixture of sterile and non-sterile items.

Modular Storage Unit

APC's Modular basket storage is integrated into the wire shelving units to provide a high-density storage system; suitable for storing a wide range of medical supplies.

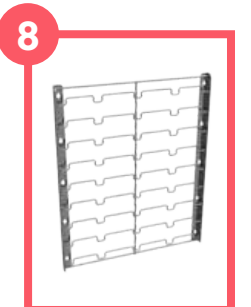

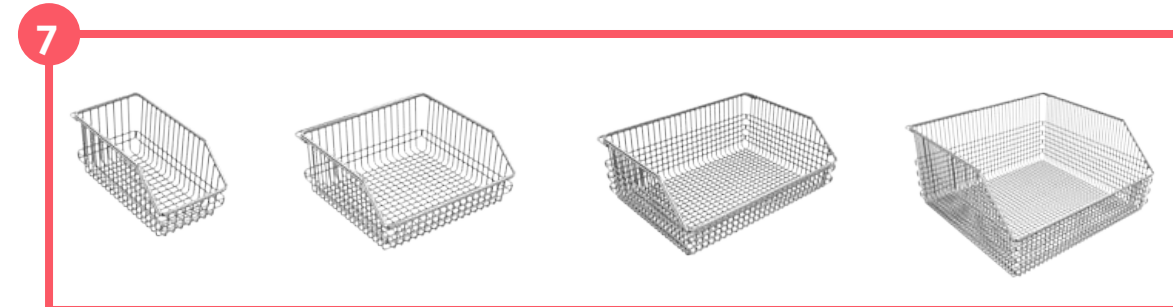

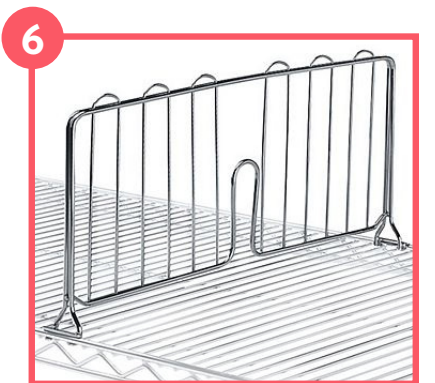

Easy slide trays allow clinicians to move trays to any configuration at any time, including to on an angle. APC's Modular Storage Unit comes in a one, two, or three bay unit.

The image shows two rows of empty wire shelving units in a clinical setting. The units are constructed from silver-colored metal poles and wire mesh shelves. The shelving on the left is taller, with four visible shelves, while the shelving on the right is shorter, with three visible shelves. The background is a plain, light-colored wall.

Wire Shelving

Wire shelving units come in a range of static and mobile shelving systems to suit any space. The wire mesh design allows dust to fall through and not collect and wire is easily cleaned allowing clinicians to maintain sterile areas.

Our durable static and mobile wire units are available with adjustable shelf heights to suit the size of the items to be stored.

Accessories WIRE SHELVING

APC's Wire Shelving units are complimented with a large range of accessories, allowing you to make the most out of them.

- 1 - Additional Shelves
- 2 - Label Holders
- 3 - Castors
- 4 - Handle

- 5 - Ledges
- 6 - Shelf Divider
- 7 - Wire Baskets
- 8 - Wire Wall Panel

Wire Baskets

APC's wire baskets offer an alternative to plastic trays. Our chrome and stainless-steel wire baskets are ideal for storing bandages, catheters, cannula's, and instruments. Wire baskets are designed using fine mesh, so even small items can be stored. Baskets range in size, from small to extra-large and include reinforced bars for extra strength and a lever system which locks easily removable dividers into place.

Stackers can be included to store baskets on top of each other. Wire baskets are perfect for use with our wire shelving systems and wall mount applications. The design of the wire wall panels allows each unit to sit flush against each other, so you can connect as many panels as you like.

Aislesaver®

The APC Aislesaver is a compactus-styled mobile shelving system represents the ultimate high-density mobile storage unit. The system slides back and forth giving you direct access to every bay. The system only requires one aisle space over the entire unit, which is a major advantage when space is limited.

Our Aislesavers are available in three configurations: manual (Ezi-Slide), mechanically assisted (Ezi-Drive), and powered (TouchDrive). The shelves are easy to adjust, and bays are available in a variety of heights and widths. APC's Aislesavers are perfect for storing files, such as medical records.

Steel Shelving

APC has a versatile and adjustable shelving range consisting of Uni-Shelf (Steel Shelving) and Uni-Span Shelving (Longspan Shelving).

Uni-Shelving is a versatile steel shelving system that can be easily added to or reconfigured. Accessories include pull-out reference shelves and drawers, wire file racks and shelf dividers.

If you require a shelving system made for the storage of heavy or longer products, our Uni-Span Shelving has the capability to carry up to 500kg UDL per shelf. With the option of using stainless steel or wire mesh shelf levels this option can be easily disinfected and remains usable in environments concerned with contamination.

Clinical Trolleys

APC's range of clinical trolleys are multipurpose and come in an assortment of designs. They are available in stainless steel making them easy to clean and ideal for sterile hospital settings, including wet areas.

Our range includes dressing trolleys, one and two draw trolleys, two and three tier trolleys, instrument trolleys, flatbed trolleys, and sliding basket trolleys.

Our clinical trolleys feature fully welded caps to ensure a smooth finish with no gaps, which reduces the entrapment of bacteria; folded edges for safety; draw runners; and casters with brakes.

Medical Record Trolleys

APC's medical record trolleys provide separate compartments for all folders and files, are lockable and come in two convenient sized units, depending on your storage requirements.

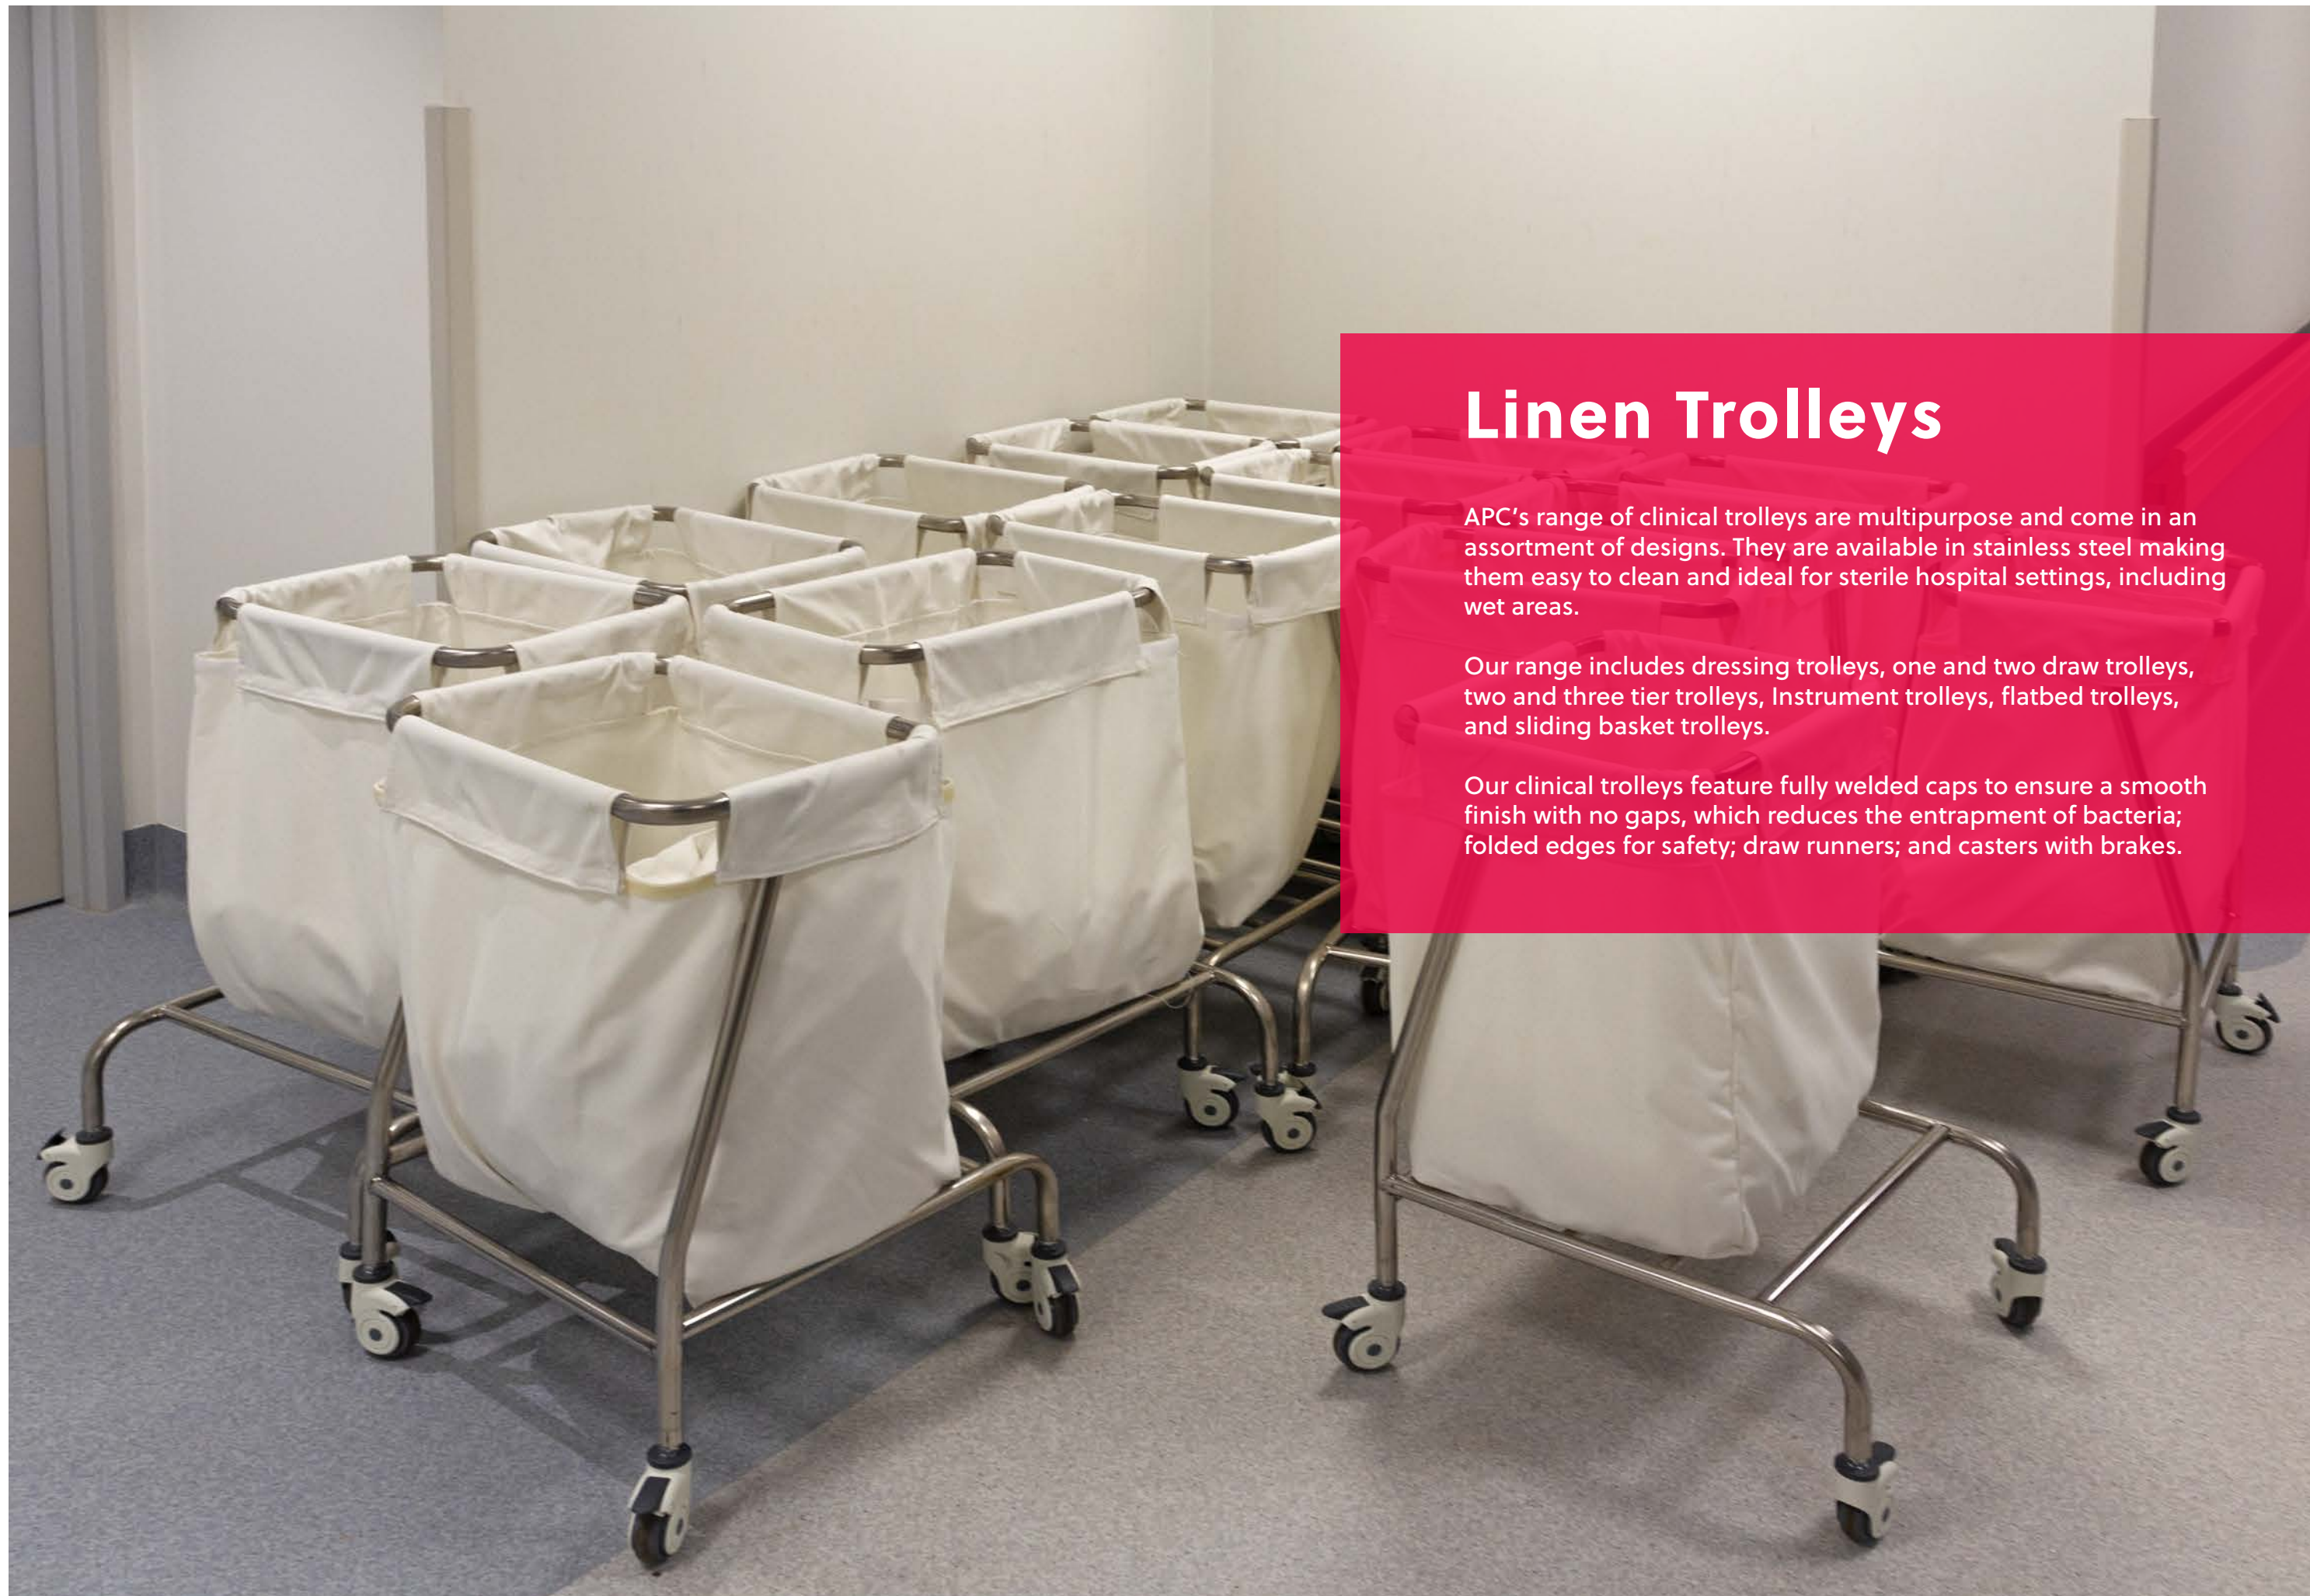

They feature castors with brakes and a push handle, so they can be easily maneuvered.

Gas Trolleys

APC's gas trolleys make handling cylinders safer and easier. We have a trolley to fit C- sized cylinders and a trolley to hold either C or D sized cylinders. Trolleys are robust and stable, featuring securing straps for safety. The medical C-D cylinder trolley handle can be adjusted, making it easy to store.

In addition to our trolleys, we also supply an oxygen bottle carrier; a trolley capable of carrying 12 size C cylinder bottles.

Linen Trolleys

APC's range of clinical trolleys are multipurpose and come in an assortment of designs. They are available in stainless steel making them easy to clean and ideal for sterile hospital settings, including wet areas.

Our range includes dressing trolleys, one and two draw trolleys, two and three tier trolleys, instrument trolleys, flatbed trolleys, and sliding basket trolleys.

Our clinical trolleys feature fully welded caps to ensure a smooth finish with no gaps, which reduces the entrapment of bacteria; folded edges for safety; draw runners; and casters with brakes.

Lockers

APC's locker range offers a compact and secure personal storage solution. Our range includes steel, ABS and heavy-duty plastic, and timber laminate lockers. APC's locker range can be ordered as a stand-alone unit or can be banked together as a bay of units, making lockers perfect for confined/restricted spaces.

We provide an assortment of locking mechanisms to ensure your lockers are not only secure but to suit the desired functionality. Our lockers also provide a large range of customisation and configuration possibilities with multiple sizes, tiers, finishes and perforations available per unit.

A long row of white tambour cabinets in a hallway. The cabinets have retractable doors and are arranged in a long line, creating a perspective view down the hallway. The floor is covered with a patterned carpet, and the ceiling has recessed lighting.

Tambour Cabinets

Tambour cabinets use retractable doors making them ideal for confined spaces and narrow corridors. Our tambour cabinets come with adjustable interior levelling feet and are fitted with a barrel exchange locking system, which comes with anti-bacterial keys. Shelving is adjustable and can withstand up to 40kg UDL per shelf. The unit can also be supplied with a range of accessories such as shelf dividers and wire file rack.

APC's large range of customisable storage cabinets also includes plan cabinets, swing door, sliding door and glass door cabinets, personal wardrobes, multimedia cabinets, filing cabinets and mobile pedestals.
