

Hume City Council Splash Aqua Leisure Centre

CASE STUDY

Hume City Council were looking for the very best of everything with the construction and design of their exciting new \$35m aqua park and leisure centre aptly named 'Splash'. Planned to attract hundreds of thousands of patrons every year the council wanted the venue to include a state-of-the-art, customised, water proof locker system that could offer staff and the community high levels of convenience and security.

Project Overview

BRIEFING

Hume City Council in partnership with the Victorian Government, Craigieburn Central and Stockland, planned the development of a multi-purpose pool and leisure centre with a variety of swimming and fitness attractions for the local community. The project was put out to government tender in 2016 to provide locker solution that would stand the test of time, fit in with the centre's ultra-modern interior plan and house a state-of-the-art RFID security system.

CHALLENGE

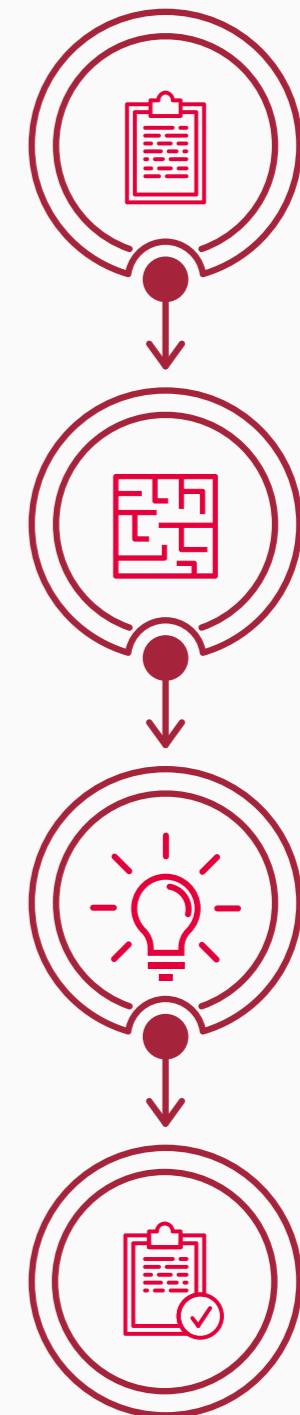

The provider needed to be able to custom design a storage solution that could house a pre-existing security mechanism. They also needed to supply and install a durable locker system that was low-maintenance, easy-to-clean and could provide colour and functionality options for patrons. The project required a supplier who could not only provide the right product - but had a proven history of working with multiple stakeholders and suppliers to bring the project to realisation.

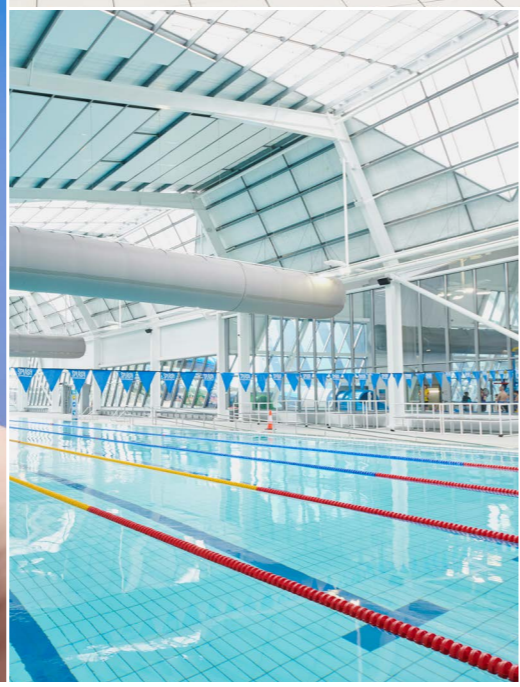

SOLUTION

APC designed and developed an ABS (Acrylonitrile Butadiene Styrene) locker system featuring stainless steel adaptors to accommodate an RFID locking mechanism and provide a corrosion-resistant storage solution. A multiple coloured door option was also provided to highlight specific locker usage in the venue.

RESULT

The Hume City Council, supporting stakeholders and the community of Craigburn now have a high-calibre water-proof locker system that is on a par with the centre's modern facilities. Not only does it provide great deal of security and practicality to patrons, it is hard waring and supports the colour theme and décor of the centre's unique commercial environment.

Flexible, Modular Design

MODULAR DESIGN ALLOWS FOR MULTIPLE CONFIGURATIONS

APC Plastic lockers come as individual units, allowing them to be assembled in a number of configurations. This modular aspect to their design allows for greater design choice and flexibility.

RFID Locking System

SMART CARD RFID PERSONAL LOCKER ACCESS

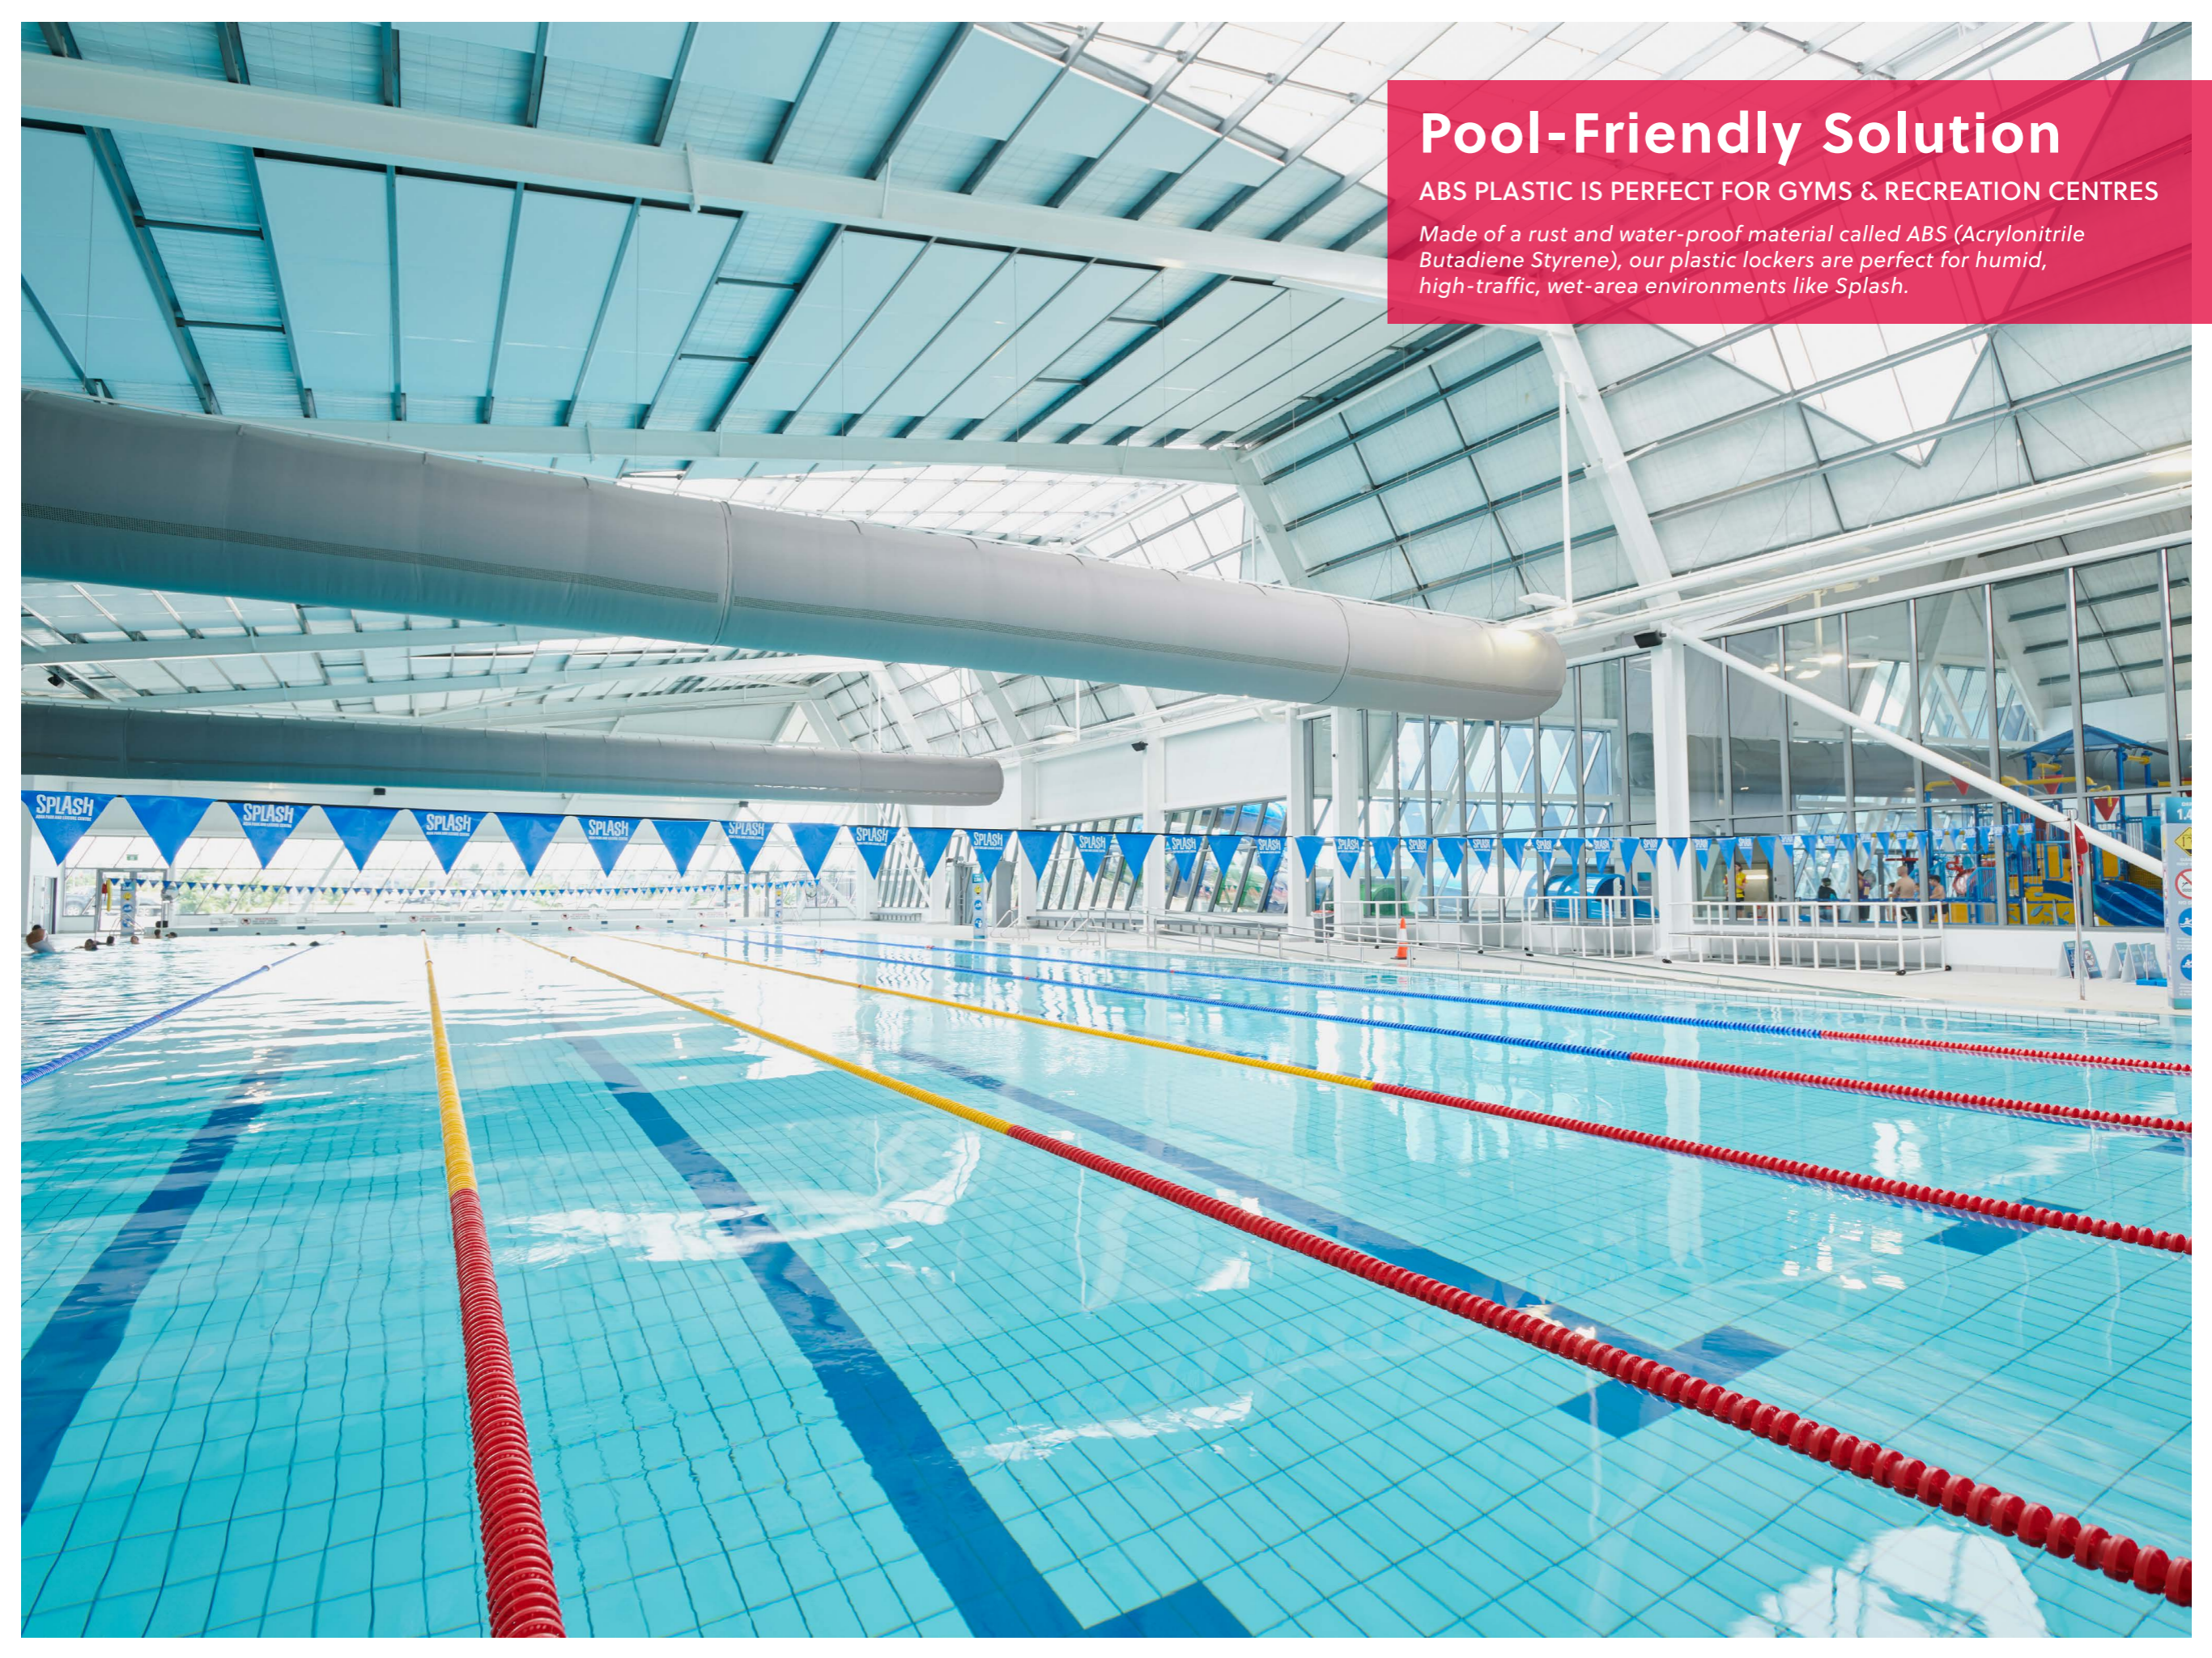

Plastic lockers were fitted with the latest Smartcard RFID (Radio Frequency Identification) locking system. This allowed for improved management and monitoring of security; as well as offering a robust, user-friendly system that was wireless and unaffected by power-failure.

Pool-Friendly Solution

ABS PLASTIC IS PERFECT FOR GYMS & RECREATION CENTRES

Made of a rust and water-proof material called ABS (Acrylonitrile Butadiene Styrene), our plastic lockers are perfect for humid, high-traffic, wet-area environments like Splash.

Locker Number Plates

SIMPLE NUMBERING SYSTEM FOR PATRONS

Simple, easy-to-read number plates were fixed to each locker allowing Splash patrons to quickly locate their lockers.

Unique Eco-Friendly Design

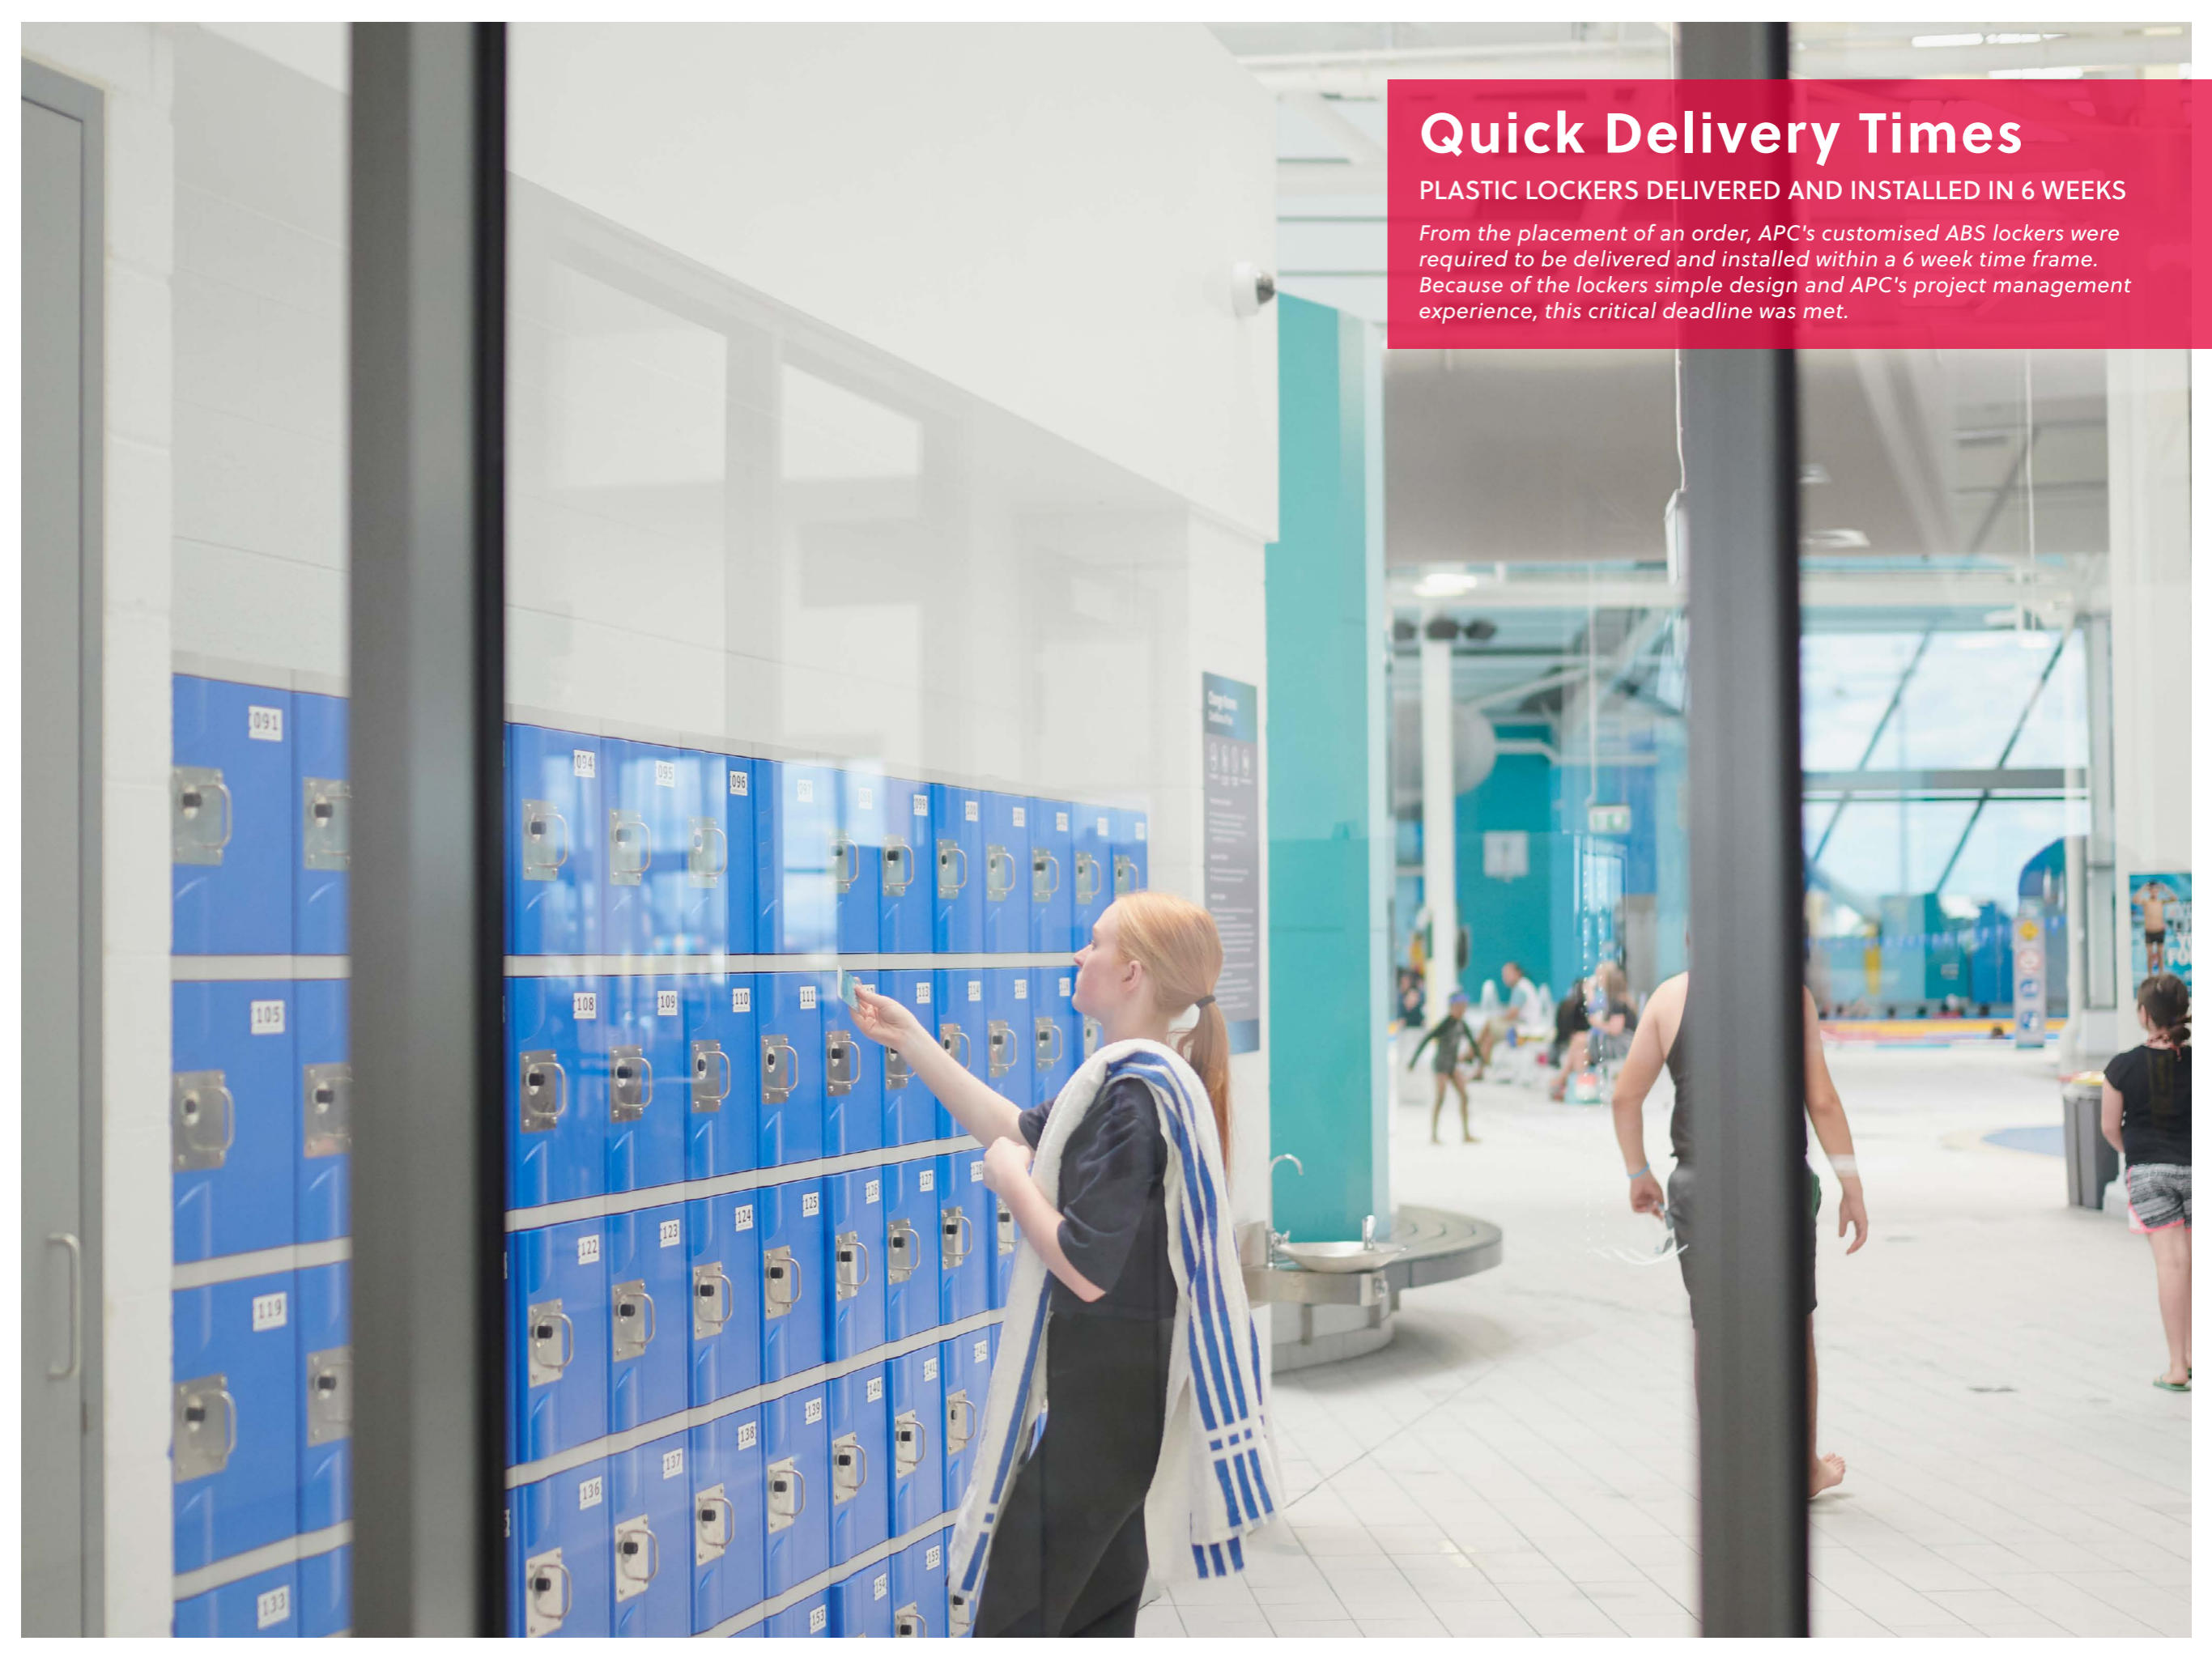

LOCKER DESIGN IS CLEAN, UNIQUE AND ECO-FRIENDLY

APC plastic lockers are distinguished by their symmetrical arc shaped doors and modern, minimalist look. They are made from eco-friendly material that can be recycled or repurposed for later use.

Quick Delivery Times

PLASTIC LOCKERS DELIVERED AND INSTALLED IN 6 WEEKS

From the placement of an order, APC's customised ABS lockers were required to be delivered and installed within a 6 week time frame. Because of the lockers simple design and APC's project management experience, this critical deadline was met.

Locker Size Options

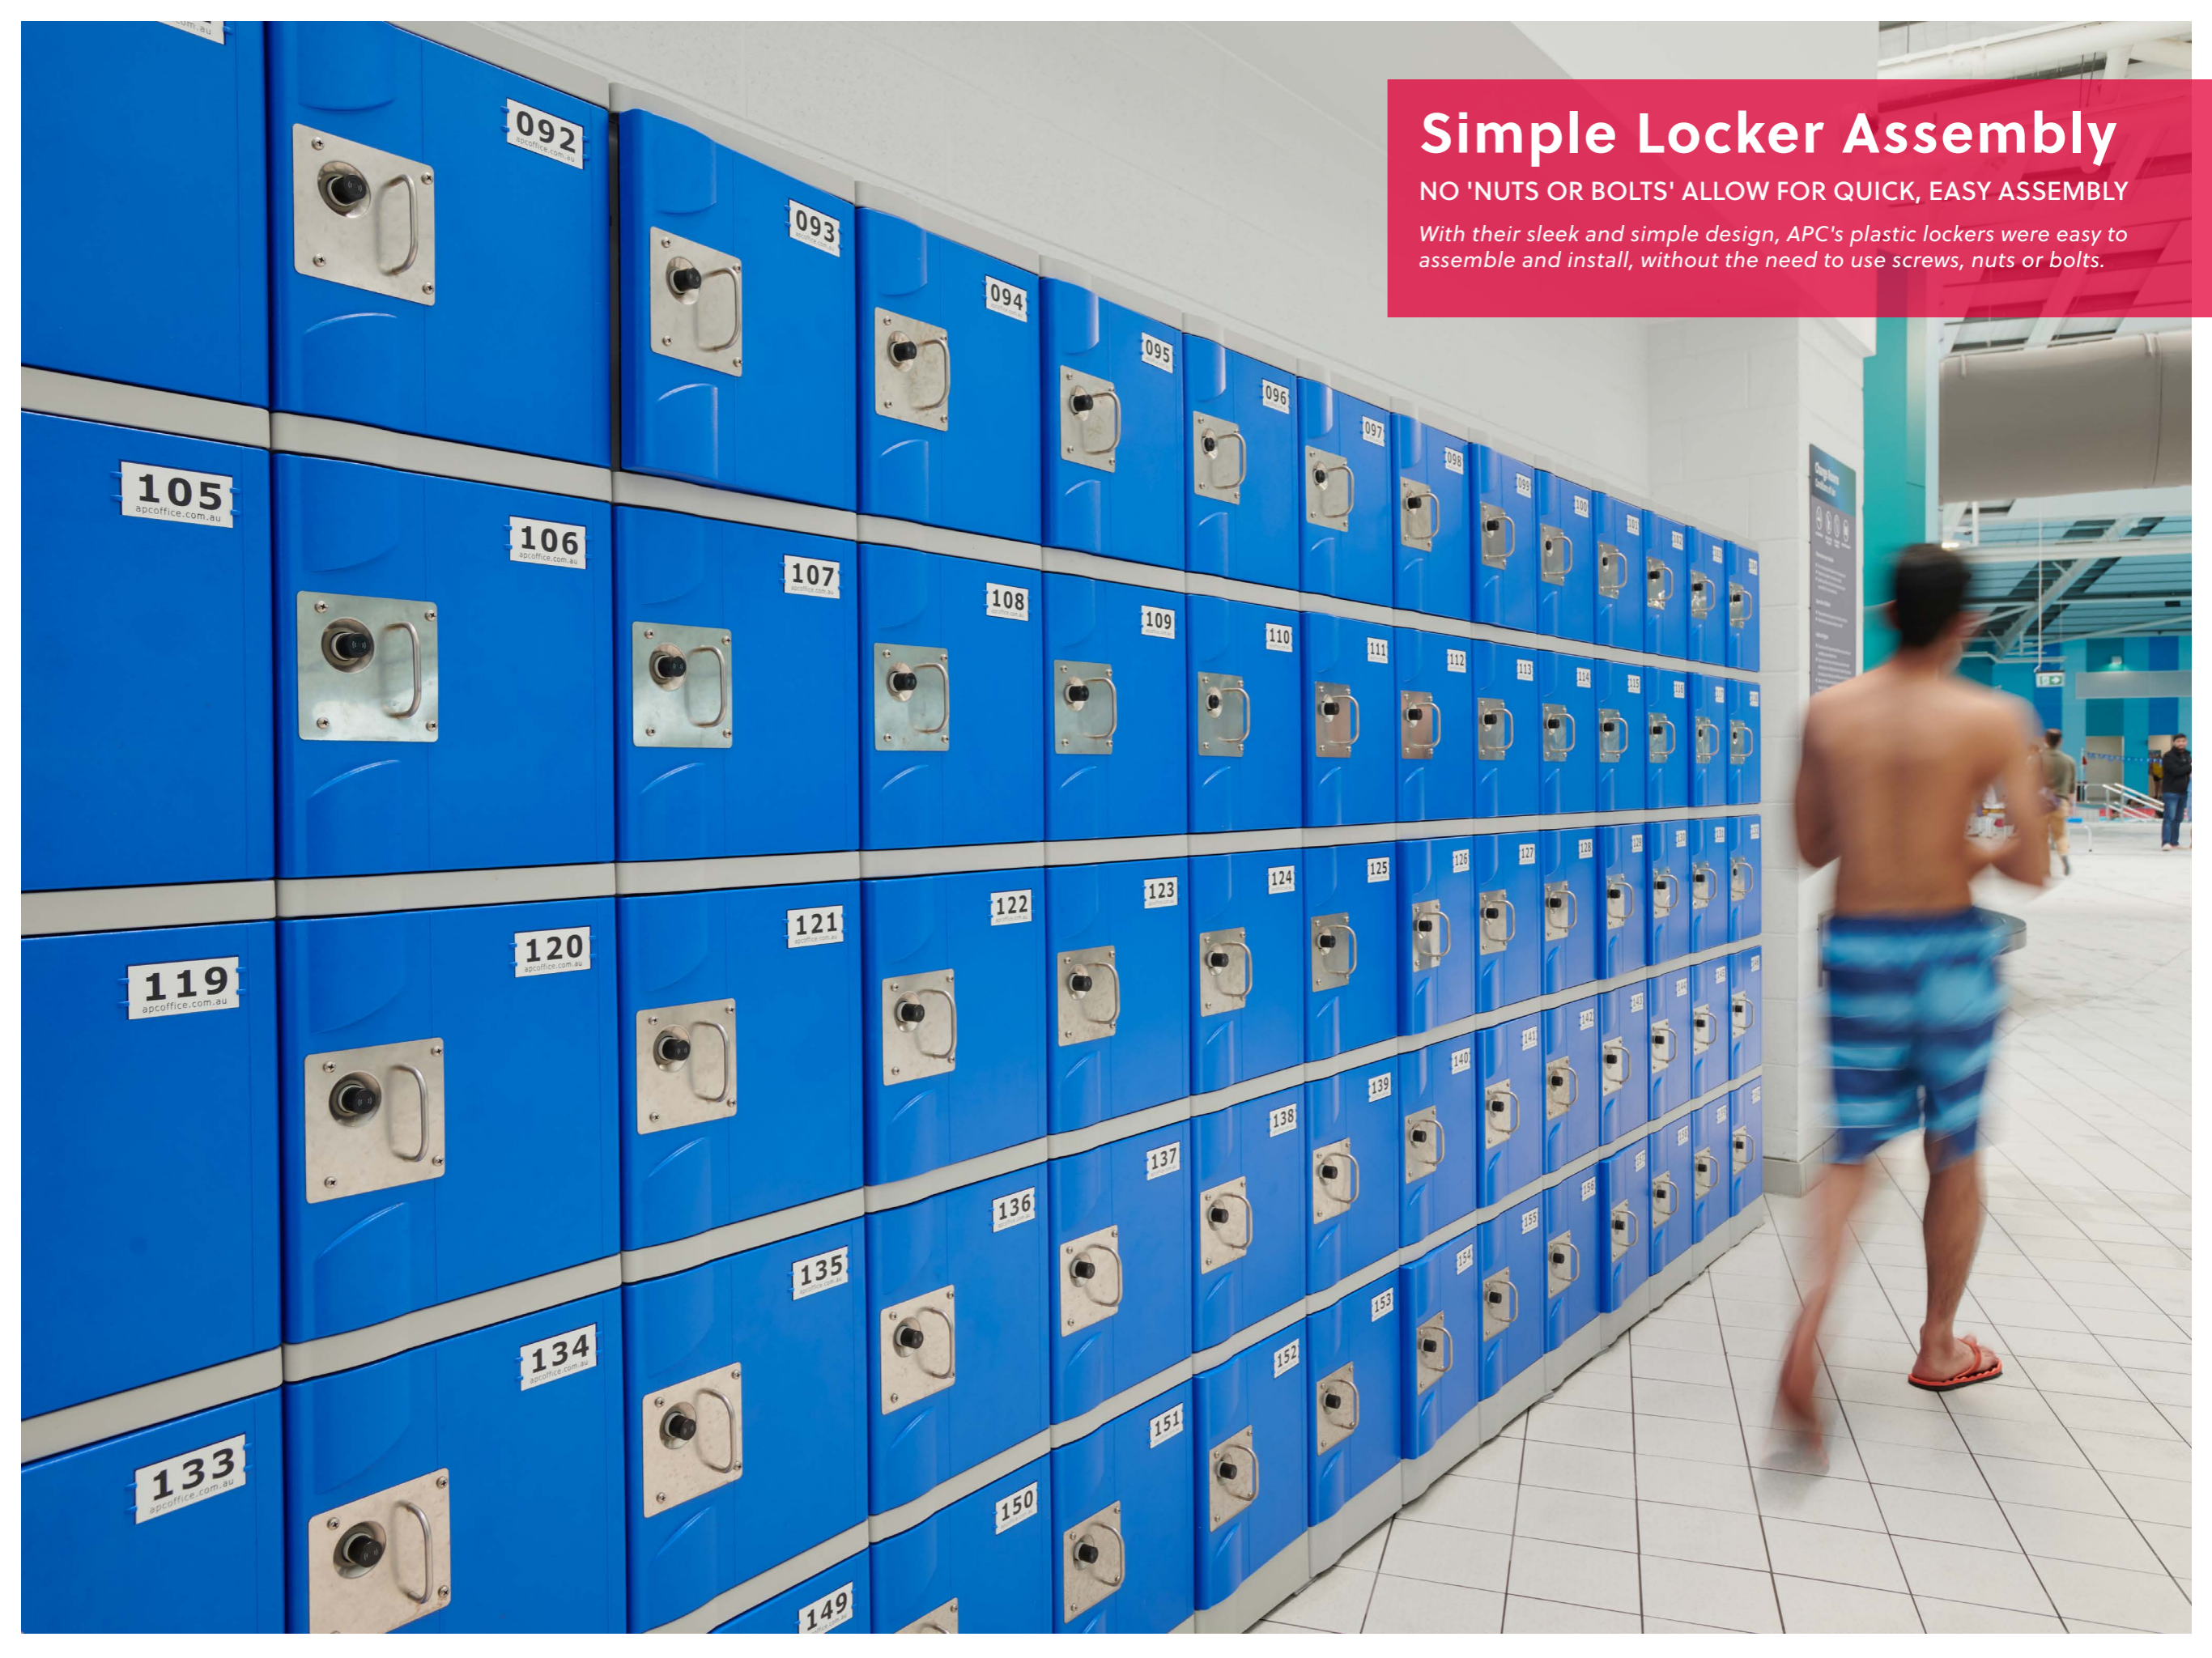

APC INSTALLED A MIX OF TWO AND FIVE TIER LOCKERS

APC installed a combination of two and five tier lockers throughout the Splash Aqua Leisure Centre to accommodate the different storage needs of patrons. The two tier locker configuration shown, is ideal for Splash patrons requiring more space for personal items.

Simple Locker Assembly

NO 'NUTS OR BOLTS' ALLOW FOR QUICK, EASY ASSEMBLY

With their sleek and simple design, APC's plastic lockers were easy to assemble and install, without the need to use screws, nuts or bolts.
