ABOUT APC

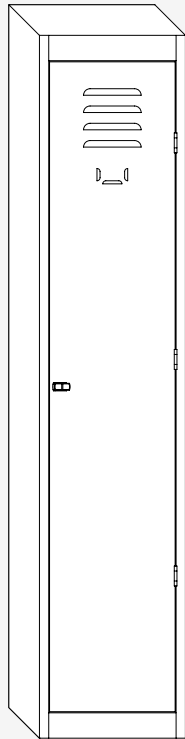

At APC, we provide efficient and flexible storage solutions for ever evolving office space designs and commercial applications.

As an Australian owned, designer and manufacturer based in Perth, we have been providing bespoke storage solutions for contemporary interiors since 1972. Catering to commercial, corporate, government, and public sector markets.

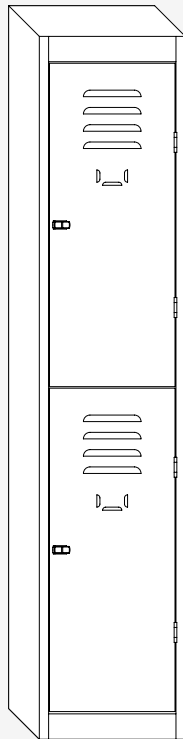

Our current storage range consists of high end Aislesavers (mobile shelving systems), Uni-Shelf (open shelving), mobile pedestals, tambour cabinets, mobile caddys, purpose built lockers and bespoke storage units.

Service is what we focus on, however it's the product, the most relevant, best-designed, world-class storage solutions that we provide.

LOCKS

At APC we try to make our lockers compatible with all locking mechanisms. However, our standard locking options are a great selection to safely secure any stored object. If you can't see an option that is right for you, just contact us.

Key Lock:

-The simplest form of locking mechanism that we supply.

Padlatch:

-The padlatch requires a padlock to be added to secure the locker.

Digital Lock:

-The P152 is the perfect digital locking mechanism. This is a keyless lock reliant on a combination to open. It is best in communal areas where many different people require access to the locker compartment.

RFID Lock:

-Made for quick access via a keycard or bracelet, the RFID lock offers a convenient swipe-to-open action made for keycard or bracelet use.

CUSTOM OPTIONS

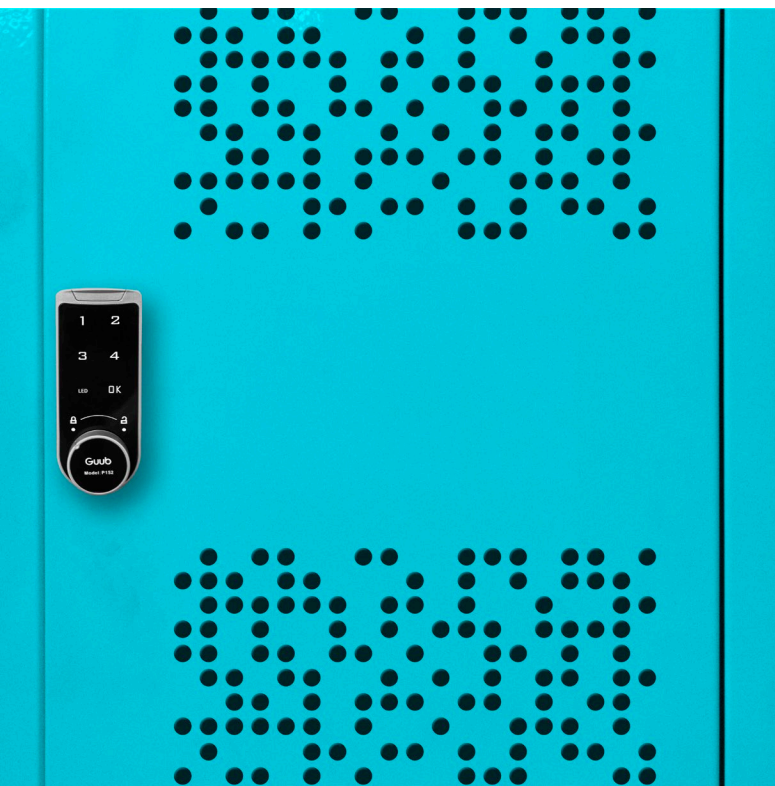

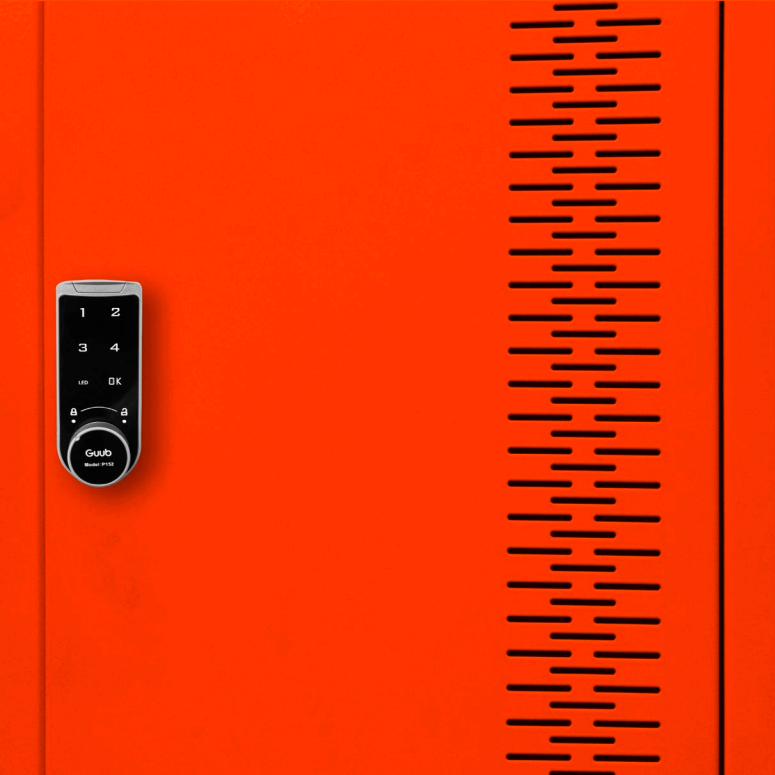

We know that sometimes standard products are not enough. To best serve our client's particular requirements, whilst providing furniture that can make every office area unique we encourage a customised approach to our locker range. Just some of the customisations we can provide are:

Size Modifications: Special sized lockers can be designed and manufactured to suit any specific uses.

Perforation Patterns: Unique patterns can be designed to set your office apart from the rest.

Acoustic Panels: Locker doors can be fitted with an acoustic-rated sound absorbing material to minimise noise in the office.

Colours: Individual units and even individual doors can be different colours.

QUALITY & ENVIRONMENTAL CONTROL

APC has developed and implemented an Environmental Management System (EMS) that not only ensures legislative awareness and compliance, but gives us the ability to identify cost savings with greater emphasis on "resource, waste and energy management" minimising our environmental footprint.

Customers can be confident that APC's strong EMS gives us the structured framework to quantify, monitor and control the impact of our operations on the environment, now and in the future.

APC also has a Quality Management System (QMS) focused on maintaining consistently impeccable customer service to our clients, along with the delivery of quality products and services that meet international standards. Our mature QMS provides us with "quality" systems, "quality" staff and the customer with a guaranteed "quality" product.

COLOURS

Our stock colour range is a refined selection that will always have the smallest lead times.

If you are looking for a customised look for your office fit out, then we also have a large range of colour options to suit your needs.

The customisable options do not stop there however. We provide the option to have a two toned locker. This is done by making the door colour different to the chassis.

For the full range of colours that we can provide, please see an up to date version of the dulux powdercoating range.

Please note: custom colouring is only available for orders over a certain quantity.
