

TOP-TRACK®

This lightweight wire shelving system is ideal for storing archive boxes or products that require easy access. Each unit comes with five shelves that can each carry a weight up to 150kg (UDL) per shelf.

With a bolt-less design, the wire shelving units are easy and quick to assemble, and are perfect for use in the medical and commercial industries.

ABOUT APC

At APC, we provide efficient and flexible storage solutions for ever evolving office space designs and commercial applications.

As an Australian owned, designer and manufacturer based in Perth, we have been providing bespoke storage solutions for contemporary interiors since 1972. Catering to commercial, corporate, government, medical and public sector markets.

Our current storage range consists of high end Aislesavers (mobile shelving systems), Wire shelving, Uni-Shelf (open shelving), mobile pedestals, tambour cabinets, mobile caddys, purpose built lockers and bespoke storage units.

Service is what we focus on, however it's the product, the most relevant, best-designed, world-class storage solutions that we provide.

CUSTOM OPTIONS

We know that sometimes standard products are not enough. To best serve our client's particular requirements, whilst providing furniture that can make every office area unique we encourage a customised approach to our wire shelving range. Just some of the customisations we can provide are:

Size Modifications: Custom sized wire shelving can be designed and manufactured to suit any specific uses.

Strength: Using the collar sleeve mechanism to deliver high weight capacities.

Colours: Individual units and even individual shelf levels can be different colours if required.

QUALITY & ENVIRONMENTAL CONTROL

APC has developed and implemented an Environmental Management System (EMS) that not only ensures legislative awareness and compliance, but gives us the ability to identify cost savings with greater emphasis on "resource, waste and energy management" minimising our environmental footprint.

Customers can be confident that APC's strong EMS gives us the structured framework to quantify, monitor and control the impact of our operations on the environment, now and in the future.

APC also has a Quality Management System (QMS) focused on maintaining consistently impeccable customer service to our clients, along with the delivery of quality products and services that meet international standards. Our mature QMS provides us with "quality" systems, "quality" staff and the customer with a guaranteed "quality" product.
